U.S. District Court, District of Colorado

2017 13.5414 *Colorado River Ecosystem, The v. State of Colorado (1:17-cv-02316).* U.S. District Court, District of Colorado. [This is the novel complaint filed by Denver-based attorney Jason Flores-Williams on behalf of the Colorado River, which sought personhood, through the rights-of-nature doctrine, for the Colorado River. It would have been the first such case in the U.S. Amended complaints were filed, which included additional plaintiffs. While the filing was for the Colorado River in the Upper Basin, it had implied application to the entire river, and thus should be at least noticed in this bibliography. Certain discussions from the literature are also cited herein, and are cross-referenced to this case before the Court. The case eventually was terminated later in 2017 based on the plaintiffs' own voluntary motion to dismiss the case. A complete summary of events is available online at https://www.courtlistener.com/docket/6158241/colorado-river-ecosystem-the-v-state-of-colorado/. A complete list of plaintiffs and defendants is also available at https://www.courtlistener.com/docket/6158241/parties/colorado-river-ecosystem-the-v-state-of-colorado/.]

Watt, James

1981 13.5487 Quotations from Secretary Watt. *Earth First!* 1(5) (May 1): 7. [Introduced by editor's note. Quotations (unverified in this bibliography) from Secretary of the Interior James Watt, who famously insisted on an aerial evacuation from a Colorado River trip in Grand Canyon. The pertinent quotation: "I went down in September on the Grand Canyon Colorado River and the test, of course, as all of you are familiar, is whether we ought to keep the motors on those rafts or not. The first day was spectacular. I'll tell you that it was an exciting thrilling day. The second day started to get a little tedious, but the third day I wanted bigger motors to move that raft out. There is no way you could get me on an oar-powered raft on that river—I'll guarantee you that. On the fourth day we were praying for helicopters and they came." The editor concludes the list of quotations, "(Really, no shit, Watt said all this!)"] [See also Reed (1981, ITEM NO. 13.5488).]

SOCIOLOGY, RECREATION, EDUCATION, ECONOMICS, AND RELATED SUBJECTS IN THE GRAND CANYON–LAKE MEAD REGION

Commentaries, themes and analyses relating to sociological, recreational, educational, and economic issues for Grand Canyon, Lake Mead, and vicinity

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 14. SOCIOLOGY, RECREATION, EDUCATION, ECONOMICS, AND RELATED SUBJECTS IN THE GRAND CANYON–LAKE MEAD REGION

OVERVIEW. This part lists analytical studies and reports that relate to socio-economic concerns, including visitor appreciation and social "quality of wilderness" studies, and items pertaining to teaching and program instruction about the human and natural history of the Grand Canyon and Colorado River. Because the waters of Lake Mead encroach upon the lower portion of Grand Canyon, for bibliographical convenience this part is expanded to include all items that relate to social and other issues in the Lake Mead region overall. Added here are educational and other materials that thematically embrace the greater Grand Canyon region, the activities of which are not necessarily conducted in the region itself.

RELATED MATERIAL

PART 2. GENERAL PUBLICATIONS for material that pertains to social, economic, and related affairs in the greater region of the lower Colorado River below Lake Mead, to Mexico

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography

PART 13. ADMINISTRATION AND MANAGEMENT for administrative issues pertaining to recreation and similar perspectives on the public lands

PART 15. HEALTH AND SAFETY for issues that pertain to workplace harassment that may otherwise be related to social issues

PART 17. NATIVE AMERICANS for issues that pertain to Native American issues in the greater Grand Canyon region

NOTES FOR PART 14

BRIEF BACKGROUND regarding two organizations cited throughout Part 14.

Grand Canyon Youth is a not-for-profit organization dedicated to serving young people. Its programs allow for the building of self-esteem and responsibility by requiring, before they may accompany a river trip, that they perform community service, design an educational project to be pursued on the river, and earn a portion of the trip price. As noted on their website, "GCY is open to any young person age 12 to 19 years old with a desire to discover the educational power of the river. Participants come from all walks of life and from different cultures, economic backgrounds, and physical abilities." The organization's programs have expanded to include other canyon rivers of the West and Southwest.

The Whale Foundation is a not-for-profit organization created "in loving memory of Curtis 'Whale' Hansen", which "provides confidential access to mental and physical health care professionals and a network of support services designed to restore, promote, and celebrate the well-being of the Grand Canyon River Guiding Community." Its mission has grown to include matters relating to social and personal support, and a scholarship. Accordingly, except for matters that specifically relate to health, all items produced by The Whale Foundation (including its news bulletin, "Back of the Boat", that is published periodically in *Boatman's Quarterly Review*), are listed in Part 14. (Specifically health-related items appear in Part 15 of the bibliography.) Anonymously produced items are cited under "The Whale Foundation", while those items that are signed are cited under the individuals' names.

[No place]: Εκδοσεισ Gutenberg [Gutenberg Publishing], pp. 168-179. [See in “2. Μεθοδολογική προσέγγιση” [2. Methodologikí proséngisi] [2. Methodological approach] (specifically, p. 173, *in translation here*) ‘According to the New Analytical Curricula of 2021 for Elementary School Science, the exploratory/discovery method is proposed, where students, through the rational way of thinking, practice critical thinking and issues of Natural Sciences and Technology, in order to become scientifically literate , tomorrow’s active, conscious citizens and creative people, who will be able to solve problems of their daily lives. The inquiry method enables in a “natural” way the discovery of knowledge, the development of skills and the formation of attitudes about the natural world, within the framework of a single physical science, with common methodology, language/terminology, mathematical expression, digital technology and applications. Thus, the students of the 4th Grade of the 1st Experimental Primary School of Ioannina in the “Natural Sciences and Technology” Group worked with guided discovery and through the scientific/educational method of mutual investigation, using individual iPads; they dealt with eight topics, which they arose out of their own interests and their own reflections. The eight topics were: a) Unmanned Vehicles, b) Satellites and Machines, c) Modern Dinosaurs, d) Fire, e) Artificial Intelligence and Robotics, f) Grand Canyon, g) Our Solar System and h) Little archaeologists.’ And see section “3.6. Γκραν Κάνυον” [3.6 Grand Canyon] (p. 176), which describes and illustrates (*in translation here*) ‘The students, after being given Google maps, searched and found the Grand Canyon area on the map, studied its geomorphology, found information about the Havasupai tribe, drew imaginary pictures from their lives and printed their pictures on paper, which they presented in a plenary session.’] [In Greek.]

[See in "案例 2.1: 黄河壶口瀑布自然景观与探险旅游 [Case 2.1: Natural landscape and adventure tourism of Hukou Waterfall on the

Yellow River], section “2. 旅游式学习，全方位科普” [2. Travel-style learning, comprehensive science popularization]; specifically, p. 65 (*translated here*), ‘The Grand Canyon in Arizona, USA, was opened as “Grand Canyon National Park” in 1919. So far, it has become one of the most visited and far-reaching national parks in the United States. The development of the canyon park tourism model places great emphasis on scientific and ecological education functions. The explanatory boards and tourist manuals introducing scenic spots in the park focus on disseminating scientific knowledge and educating tourists on geology, ecology and other sciences. For example, draw a cross-section of the rock formations seen by tourists at the location where they are standing, and indicate the names, characteristics, formation ages of different rock formations, and the causes of these specific shapes and colors. Help tourists explore changes in geology and landforms, understand rich information about nature, and acquire historical and cultural knowledge. Management training also pays special attention to ecological science education. In addition, based on its majestic natural landscape, rich ecological distribution of animals and plants, and its focus on natural ecology and adventure sports tourism, the Grand Canyon Park has systematically designed specific customer sources focusing on the adventure and scientific research tourism market. The interpretation system takes the concept of harmonious coexistence between man and nature as the starting point for the construction of the interpretation system of the Grand Canyon Scenic Area, and plays a tourism education function to a certain extent.’] [In Chinese, with document title and author credit in Chinese and English, thus.]

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS IN THE UNITED STATES AND MEXICO

15

HEALTH AND SAFETY IN THE GRAND CANYON–LAKE MEAD REGION

Issues relating to human health and safety and the well-being of the public and professional community in the Grand Canyon region or on the Colorado River through the Grand Canyon, and on Lake Mead;
including items pertaining to accidents and mishap

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 15. HEALTH AND SAFETY IN THE GRAND CANYON–LAKE MEAD REGION

OVERVIEW. This part lists items relating to human health, safety, and public well-being in the Grand Canyon National Park and immediate vicinity. Because the waters of Lake Mead encroach upon the lower portion of Grand Canyon, for bibliographical convenience this part is expanded to include all items that relate to public health and safety in the Lake Mead region overall. Included here are human-health studies made during the building of Hoover Dam. However, issues relating to Lake Mead pollution and its attendant concerns are relegated to Part 11, Section 1 of this bibliography. Items pertaining to issues of workplace harassment are included in Part 15. Items pertaining to infrastructure that has direct bearing on the topics of health and safety are included here as well. This part also lists documents on therapeutic programs, mishaps, rescues, accident investigations, missing persons, and cautionary reports by example.

RELATED MATERIAL

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography

PART 4. MEMORIALS for items reporting the deaths of individuals

PART 11, SECTION 1. LOWER COLORADO RIVER—SPECIAL ISSUES for occasional publications on health- or safety-related affairs in the greater region of the lower Colorado River below Lake Mead, to Mexico

PART 17. NATIVE AMERICANS for aspects of health concerns, and of legal litigation relating to human-health research among tribal members, and for reports and studies pertaining to safety responses in the wake of flooding events on Havasu Creek

[See p. 332; “a Cameron installation” serving El Tovar and Bright Angel Hotels at Grand Canyon (illustrated).]

1916 15.600 Army hospital trains. *In:* News Items [SECTION]. *The Chicago Medical Reporter* (Journal of the Medico-Legal Society, New Series), 38(8) (August 15): 22. [“Negotiations have about been completed by which the army medical corps is to have two hospital trains for service on the border. The trains are to be operated between the field hospitals and a base or general hospital at Grand Canyon, Colo. [*sic*], or some other desirable location.”]

1921 15.579 Making national parks safe for democracy. *Public Health Nurse*, 13(9) (September): 447. [U.S. Public Health Service addressing post-war increases in camping public in national parks; “. . . on May 15th, it sent its first sanitary engineers into Yellowstone, Mount Ranier [*sic*], Yosemite, and Grand Canyon Parks.” (SOLE NOTE OF GRAND CANYON)]

1922 15.796 Daylight saving at Boulder Canyon. *The Reclamation Record*, 13(3) (March): 51. [“In order to carry on the work of making borings at the Boulder Canyon dam site with economy and safety, the time of the camp has been advanced one and one-half hours in order that daylight can be used to advantage in prosecuting this hazardous work in the canyon which has a depth of approximately 2,000 feet at this point. [¶] The volume of water in the river at this point is subject to considerable fluctuation, especially as the spring freshets are due in a few weeks, and arrangements have been made for telegraphing advance notice of the rise in water from Grand Canyon Park about 200 miles farther up the river.” (ENTIRE ITEM)]

1924 15.1182 Water supply at Grand Canyon. *Santa Fe Magazine*, 18(2) (January): 30. [Describes the acquisition and daily transport by rail of “100,000 gallons of fresh spring water” from “Jack Smith and Flagstaff springs”.]

Anonymous (*continued*)

1926 15.732 [Humor.] *Stephenson County Farm Monthly* (Stephenson County Farm Bureau, Freeport, Illinois), 9(5) (June): 1. ["'This seems to be a very dangerous precipe [*sic*],' remarked the tourist at the Grand Canyon. 'I wonder that they don't put up a warning board.' [¶] 'Yes,' answered the guide, 'it is dangerous. They kept a warning board up for two years, but no one fell over, so it was taken down.'" (ENTIRE ITEM)] • [This anecdote, while a work of fiction, is included here for the subject matter relating to safety at Grand Canyon. In fact, the note of Grand Canyon is added in this particular item. This anecdote first appeared, without note of Grand Canyon, in *Harper's Magazine* for May 1917 (Volume 134, p. 907), and it was widely repeated in other serials, particularly during 1917 and 1918, sometimes with minor modifications. The one cited here is the only one thus far found to include "Grand Canyon". The original in *Harper's* appears in the "Editor's Drawer" section under the heading, "Proved Unnecessary", as follows: "'This seems to be a very dangerous precipice,' remarked the tourist. 'I wonder that they have not put up a warning-board.' [¶] 'Yes,' answered the guide, 'it is dangerous. They kept a warning-board up for two years, but no one fell over, so it was taken down.'"]

1929 15.427 Sewage reclaimed for industrial use at Grand Canyon National Park. *In:* News From the Field [SECTION]. *American Journal of Public Health*, 19 (February): 254.

1930 15.429 Sewage and conservation. *In:* Editorial Section. *American Journal of Public Health*, 20 (May): 520-521. [Grand Canyon, see p. 521.]

1930 15.1163 Western Branch, A. P. H. A., meets in Salt Lake City. *In:* Association News [SECTION]. *American Journal of Public Health*, 20(7) (July): 765-766. [See p. 765: "One session was devoted to the public health aspect of the Boulder Dam. This is the first time that consideration has been given to this phase of the Boulder Dam project in public meeting and was followed by the preparation of a resolution requesting the Secretary of the Interior to confer with the Surgeon General regarding the entire problem." (Regarding the resolution, see in October issue this serial, American Public Health Association, Western Branch, 1930, ITEM NO. 15.1162.)]

1931 15.1065 [Overview of deaths on the Hoover Dam project.] *Building and Engineering News* (San Francisco): 35(34) (August 22): 5.

1934 15.676 Rescue. *Time*, (May 7):. ["In Grand Canyon, Ariz., when a fractured leg trapped H. W. Moulton in a canyon bottom, rescuers hoisted his stretcher high above their heads, toiled along a river bed for 36 hours, sometimes up to their necks in water, lugged him to safety." (ENTIRE ITEM)]

1939 15.733 Grand Canyon. *In:* Here and There on the Desert [SECTION]. *Desert Magazine*, 2(6) (April): 32. ["When they disregarded rangers' warnings and set down Bright Angel Trail into the Grand Canyon during a February blizzard two tourists met disaster. Casimir Poltark, 22, of Detroit, was caught in the storm 1,000 feet below the rim and froze to death. Desjardins sought refuge in a cave, was removed to a hospital so badly frozen it was feared amputation of his feet would be necessary." (ENTIRE ITEM)]

1909 15.596 Market fruits and disease. *In:* Proceedings of the Thirty-sixth Annual Convention of the Horticultural Society of Central Illinois held in Hoopeston, Ill., Wednesday and Thursday, Dec. 18 and 19, 1908. *Illinois State Horticultural Society, Transactions*, New Series, 42 (for 1908): 312-318. [See p. 313: "The potato plant itself contains a very active poison, though there is little or none of the substance in the tubers as they are brought to the table. When, however, these esculents are exposed to the sun, the poison develops rapidly and the acrid taste becomes pronounced. Major Powell relates that in his exploring trip down the canon of the Colorado river when the party had lost most of their food supplies, they boiled some green potato tops, a patch of which they found at a camping place, and ate them as greens. All were made desperately sick—a result that should not be surprising, at least to a botanist." (ENTIRE NOTE)]

[2014.] [Date obtained from URL of an online posting of this document.] [Study conducted (as noted on p. 8) on "the Grandview Trail to Tonto Trail leading down to the Colorado River and the first part of the Escalante Route." Specifically (p. 68): "The original case study was to observe the differences between the various residual limb length categories of transtibial amputees. This case study subject was abandoned due to some last minute cancelations with the group's amputee participants. The decision to monitor the volume fluctuations within the amputee members' residual limbs was made. The amputee and non-amputee members within the group were also tracked for their falls throughout the trip. In addition to the fall count and residual limb measurements, the number of times an amputee had to stop and remove their prosthesis was counted."]

[See p. 287 in section, “Təyyarə qəzalarına nümunələr” [Examples of plane crashes] (somewhat poorly composed): “Təyyarələrin qəzaya uğraması müxtəlif səbəblərdən baş verir. Bu səbəblər bəzən insan, bəzən də texniki nasazlıq nəticəsində yarana bilər. İnsan səhvlərindən yaranan təyyarə qəzaları özlüyündə olduqca müxtəlifdir. Məsələn, bəzən mədəni fərqliliklər, bəzən də dil problemləri qəzalara səbəb ola bilər. Texniki nasazlıqların səbəb olduğu qəzalar tamamilə fərqli səbəblərə əsaslanır. 1956-cı ildə bir DC-7 təyyarəsi və bir L1049 təyyarəsi Amerikada Böyük Kanyon üzərində təxminən 20.000 fut yüksəklikdə bir ərazidə toqquşmuşdu və bu qəza 128 sərnişinin ölümünə səbəb olmuşdu.” [Airplane crashes happen for a variety of reasons. These reasons can sometimes be caused by human and sometimes by technical failure. Aircraft accidents caused by human error are quite diverse in themselves. For example, sometimes cultural differences and sometimes language problems can cause accidents. Accidents caused by technical malfunctions are based on completely different reasons. In 1956, a DC-7 and an L1049 collided at about 20,000 feet above the Grand Canyon in America, killing 128 passengers.]. [In Azerbaijani with bilingual titles.]

[U.S. National Park Service]

1925 15.1231 Tentative agreement covering the construction and operation of sewage-treatment plant, and use and diversion of effluent recovered therefrom, at the Grand Canyon National Park, Grand Canyon, Ariz. *In: National Forests and the Public Domain : hearings before a subcommittee of the Committee on Public Lands and Surveys, United States Senate, Sixty-ninth Congress, First Session, pursuant to S. Res. 347 : June 18, 1925 : Part 5.* Washington, D.C.: U.S. Government Printing Office, pp. 1526-1527. [S. Res 347, to investigate all matters relating to national forests and the public domain and their administration.] [Part 5, subcommittee meeting “at the schoolhouse in Grand Canyon National Park, Ariz[.], Senator Ralph H. Cameron, presiding.”] [This item is a document introduced into the record, following on the testimony of the superintendent of Grand Canyon National Park (see J. R. Eakin, 1925, ITEM NO. 13.5196). The agreement is on the authority of an act of Congress, March 3, 1925. Of special note: “On account of the excessive high cost of fresh water at the canyon and the absence of any supply which can be developed to materially lessen this cost it is necessary to treat the sewage so that the effluent may be used again for boiler feed, cooling water for Diesel engines, irrigation, and restricted toilet purposes.”]

ARCHAEOLOGY AND CULTURAL RESOURCES IN THE GRAND CANYON REGION

Archaeological history and research in the Grand Canyon region, including now-historical cultural activities of the 16th to 20th centuries

With an APPENDIX: General Guide to Documentation for Pertinent Places Listed in the NATIONAL REGISTER OF HISTORIC PLACES and in the NATIONAL HISTORIC LANDMARK SYSTEM Administered by the U.S. National Park Service

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 16. ARCHAEOLOGY AND CULTURAL RESOURCES IN THE GRAND CANYON REGION

OVERVIEW. This part includes items that relate to archaeological surveys and studies of human remains, artifacts, and cultures during the period from early human inhabitation of the Grand Canyon region to recent historical activities of the 16th to 20th centuries, including historical-structures reports.

RELATED MATERIAL

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography

PART 11, SECTION 3. LOWER COLORADO RIVER REGION—ARCHAEOLOGY AND CULTURAL RESOURCES for selected material relating to the lower Colorado River region more generally. *Note that citations regarding the archaeology and cultural resources of the Lake Mead region are included in Part 11, Section 3.*

NOTES FOR PART 16

SOME ARCHAEOLOGICAL items dated during and after the later-20th century may be available to the public only in redacted versions, wherein culturally sensitive or specific geographical data are removed or [redacted] obliterated. Unredacted versions will be in files accessible to qualified researchers and administrators. If no note regarding redacted parts appears with the document, or if there is no such note with its citation here, it does not necessarily mean that the document as seen or as available does not have data redacted. One may assume that modern publications in scholarly serials already have been written in such a fashion that sensitive or restricted geographical or cultural information is left out. Pagination for some such reports as listed herein may omit additional pages or sections that did not appear in the redacted version that was cited for the bibliography. Material in earlier publications that may be deemed to be sensitive or that would be redacted today is now a matter of the published, public record.

Documents or citations that may have been seen by the compilers that pertain to wholly restricted documents, not available publicly, are not cited in this bibliography. While thus not properly compiling the body of work of individuals, organizations or agencies within the scope of this bibliography, the general unavailability of a document awards no merit for inclusion within a work such as this one, which identifies publicly available materials. As with documents that had been denoted as “classified”, “restricted” or “secret” for purposes of national security, but which later were reclassified for public release, only then are these and comparably unsecured documents included in this bibliography.

The spellings “archaeology” and “archeology” are as used in document titles or quotations.

Included in this section are pertinent U.S. National Park Service summary records for historic sites, which include the Historic American Buildings Survey (HABS), Historic American Engineering Record (HAER), and Historic American Landscapes Survey (HALS) series. Most of these are accessible online through the Library of Congress website; and there, many of them are supplemented by large numbers of photographs and other graphical material.

Further included in Part 16 are items that might usually be considered works of fiction or cryptoarchaeology; for example, those that relate to the putative “Egyptian” cave of the Grand Canyon, “discovered” and reported by one G. E. Kinkaid in 1909, which continue to appear in alternative literature; and similar references to sequestered sites. Inasmuch as such items are *topically* about archaeological and (liberally speaking) cultural resources, they are included here.

ANONYMOUS

PUBLICATION NOT DATED: DATE ESTIMATED, ATTRIBUTED, OR KNOWN FROM ORIGINAL RECEIPT

NO DATE 16.493 [Photo with legend, "Site of Ancient Khiva [*sic*], Grand Canyon National Park".] *Eugenics Pamphlets* (Eugenics Society of Northern California, Sacramento), (62): 23. [1949, as determined from a date calculated from information on p. 1.] [Author is probably C. M. Goethe.] [Note of ruins in Grand Canyon, which may remain from Native American populations that died off. Promotes an idea of "extinction" with modern day examples of population.]

NO DATE 16.1 [Brochure, self-guided tour of Tusayan ruin, South Rim, based on preliminary work of Douglas W. Schwartz.] [U.S. National Park Service, Grand Canyon National Park], 4 pp. [*Ca.* 1974.]

≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 5-7|

NO DATE 16.2 *Visiting archaeological sites at Grand Canyon National Park.* [U.S. National Park Sevice, Grand Canyon National Park], [2] pp. [Copy received from Grand Canyon, 1995.]

NO DATE 16.1488 *Cave in Grand Canyon : mysterious ancient lost civilization of giants.* [No imprint], [25] pp. [Alternative literature.] [An on-demand publication.] [Copy acquired as new, 2022.]

DATED PUBLICATIONS, GROUPED BY YEAR

1891 16.740 Prehistoric architecture. *Engineering News*, 25(6) (February 7): 122. ["In our own country we have yet much to learn of the real history of the cliff dwellers and architectural works in New Mexico and Colorado. In his late exploration of the Grand Cañon of the Colorado, Mr. [Robert Brewster] Stanton made new and most interesting discoveries of remains of this character that are not yet made public; but many articles found, including perfect mummies, have practically convinced Mr. Stanton that the original inhabitants and builders of these almost inaccessible homes belonged to a period much more remote than any yet fixed for them, and that the immediate predecessors of the 'red man' of a century or two ago had themselves, cuckoo-like, simply occupied the works of an earlier race." (ENTIRE NOTE)]

1894 16.654 Prehistoric remains in the Grand Cañon of Colorado [*sic*]. *British and American Archaeological Society of Rome, Journal*, 2(4): 177-180. [Abstract of a presentation by Rev. Dr. Nevin at the meeting of February 27, 1893. Title from wrapper of the *Journal* for this number.]

Anonymous (*continued*)

1897 16.3 The home of Arizona's prehistoric people. *Arizona Educator*, 3 (September): 12. [Includes Grand Canyon.] [From the *Williams News*.]

≡ CROSS-LISTINGS GOODMAN 45

1900 16.864 [Notes on the contents of a copy of *American Anthropologist*, date not stated.] *Science of Man and Journal of the Royal Anthropological Society of Australasia*, New Series, 3(11) (December 22): 186. [See reference to "Ruins of Pueblo in Arizona": "These were built of lava and limestone, and cave-like rooms dug in volcanic breccia with vertical and lateral entrances, the Havasupai, who lived in these at the time of the Spanish Conquest, and then retreated to cataract canon." (ENTIRE NOTE, *sic*)]

1901 16.1059 [Notes on the contents of a copy of *American Anthropologist*, date not stated.] *Science of Man and Journal of the Royal Anthropological Society of Australasia*, New Series, 3(4) (April 22): 39-40. [See p. 39: "G. W. James describes the Havasupai tribe which makes it home in the depths of Cataract Canon of the Colorado River, and the cliff dwellings in ruin in the Walnut Canon and a prehistoric irrigation canal, and some circular food stores near Shinumo Creek are described." (ENTIRE NOTE)]

1902 16.744 Talks on cliff dwellers. Col. Ben R. Hite of Colorado River makes some interesting discoveries—Claims mysterious people existed on continent 12,000,000 years ago. *Deseret News*, (March 21): 1 [issue pagination].

1903 16.683 On the rim of the Grand Canyon. *New Century Path*, 6(30) (June 7): 1, 2.

1903 16.681 Cliff-dwellings in the Grand Canyon [*sic*]. *In:* Brief Glimpses of the Prehistoric World [SECTION]. *New Century Path*, 7(7) (December 27): 8. ["The mummy of a cliff-dweller has been found in the Grand Cañon [*sic*] of Arizona, during some excavations on the site of a buried village." Item signed "Student".]

1905 16.761 Sun-god discovered in Arizona. *In:* Archeology, Paleontology, Ethnology [SECTION]. *New Century Path*, 9(1) (November 12): 5. [W. L. Bachtell discovery of a "statue of a deity", found "on the rim of the Grand Canyon of the Colorado in the Buckskin Mountains" [Kaibab Plateau].] [Item signed "Student"; credited to "an Eastern paper". *NOTE*: The newspaper item thus credited could be this item: "War God Idol of Stone. How It Was Found In a Colorado Canyon. First Seen By a Prospector. Archaeological Relic Discovered In Cavern In Buckskin Mountains Is Supposed to Have Been left by an Unknown Race—Chiseling on Image So Fine That Even the Hair Is Thus Marked on the Idol." *Oswego Daily Palladium* (Oswego, New York), September 21, 1905, p. 7.] [See also Carolus (1915, ITEM NO. 16.997).]

1909 16.1018 Preservation of archaeological sites. *Nature* (London), 80 (March 25): 115-116. [Notes U.S. presidential proclamations establishing national monuments, including: ". . . the Grand Canyon National Monument, which includes a large number of cliff-dwellings, pueblos, dwelling sites, and burial places in the Grand Canyon of the Colorado." (ENTIRE NOTE)]

Anonymous (*continued*)

1909 16.1061 Explorations in Grand Canyon. Mysteries of immense rich cavern being brought to light. Jordan is enthused. Remarkable finds indicate ancient people migrated for Orient. *Arizona Gazette* [Phoenix newspaper], (April 5): 1, 7. [Regarding Egyptian artifacts supposed to have been found in a Grand Canyon cave by G. E. Kinkaid. Although most general newspaper items are not cited in this bibliography, this article is cited because it has a long citational following in numerous venues to the present day, usually without citation other than *Arizona Gazette* for 1909. "Jordan" is alleged to be Prof. S. A. Jordan of the Smithsonian Institution, who ostensibly was conducting further explorations.]

1909 16.1060 Remarkable finds in Grand Canyon. *Deseret News*, (May 1): 5 [issue pagination]. [Supposed discovery of Egyptian artifacts in Grand Canyon cave by G. E. Kinkaid, as reported in the *Arizona Gazette*.]

1912 16.863 Meeting of January 16, 1912. *In:* Proceedings of the Anthropological Society of Washington [SECTION]. *American Anthropologist*, New Series, 14(3) (July/September): 564-566. [See pp. 565-566, note of Hualapai and Havasupai traditions "that their ancestors constructed some of the buildings described"; and note (p. 566), "Dr. Aleš Hrdlička showed a series of views of Havasupai and Walapai huts".]

1913 16.945 Yale geologists' western work this summer. *Yale Alumni Weekly* (Yale University, New Haven, Connecticut), 22(35) (May 16): 891. ["The work of [Herbert E. Gregory] this season will be, in general, confined to a district in the vicinity of San Francisco Mountain between the Grand Canon and the Little Colorado." The focus will be on an examination of archaeological ruins, with "recommendations made to the Government for the rpeservation of the most interesting as national monuments."]

1918 16.627 [Brief note on Neil M. Judd's archaeological "explorations of the House Rock valley and the Pahreah and Wahalla plateaus, on the north rim of the Grand Canyon in northern Arizona."] *In:* Scientific Notes and News [SECTION]. *Washington Academy of Sciences, Journal* (Washington, D.C.), 8(13) (July 19): 463.

1920 16.860 [Squaw Creek mesa burials.] *The Indian's Friend*, 32(5) (May): 3. ["That the Squaw Creek mesa, fifteen miles east of Grand Canyon, was the burial ground of an ancient tribe of dwarfs, is the opinion of H. L. Loomis, prospector, who says he recently uncovered portions of nineteen skeletons there. All the bones were those of a diminutive race. [¶] In the old graves the prospector found a cupful of turquoise and small pieces of ancient pottery, some of which have been sent to the University of Arizona and the remainder to the Smithsonian Institution." (ENTIRE ITEM) Credited to *The Indian News*.] [Locale misidentified? Cited here for its reference to Grand Canyon.]

1920 16.940 [Neil M. Judd fieldwork.] *In:* Scientific Notes and News [SECTION]. *Washington Academy of Sciences, Journal* (Washington, D.C.), 10(11) (June 4): 339-340. ["Mr. Neil M. Judd, Curator of American Archeology, U. S. National Museum, left Washington on May 1 for the purpose of continuing his archeological investigations of the region north and west from the Rio Colorado. The present reconnaissance will be conducted chiefly in northwestern Arizona." (ENTIRE NOTE)]

Anonymous (*continued*)

1921 16.748 Discovery of Mesa Verde. *The Granite Cutters' Journal* (Quincy, Massachusetts), 44(11) (February): 27. ["Such a valley, for example, is the Grand Canyon of the Colorado, but the Grand Canyon was not frequented by Cliff Dwellers." (ENTIRE NOTE) No further note of Grand Canyon.] [*From* Bradford, Mary C. C. (1918, ITEM NO. 16.747), without credit.]

1925 16.1455 Antiquity of man. Stories in stones. *Theosophy* (The Theosophy Company, Los Angeles), 13(8) (June): 358-361. [See p. 360, nearly the full page regarding the rock art in Havasu Canyon, published by the Doheny Scientific Expedition (Hubbard, no date, ITEM NO. 16.217).] ["Antiquity of Man" is an ongoing feature in *Theosophy*. See also in this series notes of "Mr. Hubbard's discovery—which nevertheless bides its time in the depths of the Grand Canyon to bring confusion to theory" (13(2) (December 1924): 81), and "There are pictures of dinosaurs and extinct forms of animal life, though perhaps not as unmistakable as those found by the Hubbard Expedition in Grand Canyon . . ." (13(6) (April 1925): 259). For each of these earlier notes, there is no further mention of the Grand Canyon rock art.]

1925 16.1448 Podivuhodný nález kresby jaštera dinosaura v Amerike. *Slovenský Svet* (Bratislava), 5(26) (July 23): 417-418. [Regarding the rock art in Havasu Canyon, published by the Doheny Scientific Expedition (Hubbard, no date, ITEM NO. 16.217).] [In Slovak.]

1925 16.1122 The "dinosaur" pictograph discovery. Did man inhabit Arizona ten million years ago? *The Theosophical Path*, 29(4) (October): 322-336. [Item signed "Student".] [Regarding the rock art in Havasu Canyon, published by the Doheny Scientific Expedition (Hubbard, no date, ITEM NO. 16.217).]

1928 16.4 Cliff ruins in Grand Canyon Park. *El Palacio* (Santa Fe, New Mexico), 25: 78-79.
≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 5-7|

1931 16.5 [Skull of "Pueblo Indian child" found in "small canyon" north of Rowe's Well.] *Grand Canyon Nature Notes*, 5(3) (January): 33.

ARCHAEOLOGY AND CULTURAL RESOURCES IN THE GRAND CANYON REGION

APPENDIX

General Guide to Documentation for Places in the Greater Grand Canyon Region Listed in or Nominated to the NATIONAL REGISTER OF HISTORIC PLACES and the NATIONAL HISTORIC LANDMARK SYSTEM Administered by the U.S. National Park Service

Sites and Resources are Arranged in the Following Groups

(in the PDF document the lines below are hyperlinks)

SOUTH
Grand Canyon National Park
Grand Canyon National Park (Grand Canyon Village)
Grand Canyon National Park (South Rim, outside of Grand Canyon Village)
Grand Canyon National Park (South Rim, M. E. J. Colter Buildings)
Kaibab National Forest (Tusayan Ranger District)

NORTH
Grand Canyon National Park (North Rim)
Kaibab National Forest (North Kaibab Ranger District)
Arizona Strip Region (outside of Grand Canyon National Park and Kaibab National Forest
Glen Canyon National Recreation Area (Lees Ferry District)

OTHER SITES IN THE GREATER GRAND CANYON REGION

ADDENDUM: Ancillary list of contractual historical-structures and cultural landscape reports unrelated to National Register nominations

PART 16. ARCHAEOLOGY AND CULTURAL RESOURCES IN THE GRAND CANYON REGION

APPENDIX

GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE GREATER GRAND CANYON REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

All information in this Appendix, including illustrations, is derived from the original Nomination documents. Selected text is reproduced from the summary or the statement of significance portions of the nomination.

THIS APPENDIX identifies the documents that were used to nominate specific places of historical or cultural interest for inclusion in the National Register of Historic Places. Some places were also nominated to be listed as National Historic Landmarks. The U.S. National Park Service oversees both lists. Briefly, **“The National Register of Historic Places is the official list of the Nation’s historic places worthy of preservation. Authorized by the National Historic Preservation Act of 1966, the National Park Service’s National Register of Historic Places is part of a national program to coordinate and support public and private efforts to identify, evaluate, and protect America’s historic and archeological resources.” National Historic Landmarks “are nationally significant historic places designated by the Secretary of the Interior because they possess exceptional value or quality in illustrating or interpreting the heritage of the United States.”** Places are often listed on the National Register before being nominated for National Historic Landmark Status. (Information from respective NPS websites, https://npgallery.nps.gov/NRHP/About/ and https://www.nps.gov/nhl/. Most places listed in this appendix have nomination documents that may be located through the search page at https://npgallery.nps.gov/NRHP.) (Links valid as of March 3, 2022.)

Some places are included within separately nominated “Historic Districts” that embrace many associated places of common historical significance. Other places rely on data from State-based preservational organizations.

While these documents are not “published” *per se*, and thus do not have a convenient citation style, they are a matter of public record, and multiple copies may be available in collections across the country. They often contain detailed historical information and supporting documention that may not be accessible elsewhere.

For continuity with the remainder of this bibliography and in order to identify unique documents, each is assigned an ITEM NO. within Part 16.

In addition, interested users may wish to refer to entries listed in Part 16 under:
U.S. National Park Service, Historic American Buildings Survey (HABS)
U.S. National Park Service, Historic American Engineering Record (HAER)
U.S. National Park Service, Historic American Landscapes Survey (HALS)

For National Register and National Landmark documents in the *lower Colorado River region*, see Part 11, Section 3A.

NATIONAL REGISTER NOMINATIONS

As an example of the format of some of the National Register nomination forms, which were modified over the years but mostly included the same documentary information, the one for El Tovar Hotel at Grand Canyon's South Rim is reproduced on the next nine pages but omits its accompanying illustrations.

El Tovar Hotel, early 1900s

Describe the present and original (if known) physical appearance

El Tovar is a large hotel built twenty feet from the very edge of the south rim of the Grand Canyon. The building's foundation is rubble masonry and concrete. The superstructure is of wood frame construction. The first floor is sheathed with log slab siding complete with finely-honed corner notching that gives the appearance of log construction. The upper stories have rough weatherboards. Log-slab moldings surround the windows on the first floor; those on the upper stories have heavy, milled moldings.

The building has multiple roofs at several different levels that add to its architectural interest, visual appeal, and spatial experience. At the uppermost level is the wood turret, wrapped in shingles and serving as the most important element of the identifiable silhouette of El Tovar. Directly below that is the hip roof with bracketed eaves that shelters the central portion of the building, including the lobby and mezzanine lounge. The three-story wings to the north and south that flank that central portion have mansard roofs pierced by dormers. On the north and south ends the roofs step down to two- and one-story terraces. The main entrance on the east side of the building has a gable roof with a hipped end covering the large entrance porch. Further architectural emphasis on the main entrance includes the L-shaped walls of stone masonry bordering the outside edges of the entrance porch. The original sign identifying the building as El Tovar and bearing the Tovar coat of arms hangs above the entrance stairs, supported by a peeled log framework.

Porches on the canyon end have peeled log posts. The railings along all of the terraces and porches have jigsawn balusters cut in patterns reminiscent of Swiss chalet detailing. The upper terraces have tapered posts approximately 10 feet in height and topped with trefoils that separate the sections of low railing and provide additional interest to the building's silhouette. The large porch on the north end of the building has two attached gazebos at the east and west. The porch's lintel contains a quote from C.A. Higgins' "The Titan of Chasms" in wrought-iron letters reading: "Dreams of mountains, as in their sleep they brood on things eternal." An access ramp for wheelchairs was added to this north end of the building.

At the southernmost end of the building the surrounding grade drops down to the hotel's basement level. The coursed rubble masonry walls of this end of the building contain arched openings similar to those in the stone corner wall of the entrance porch.

Builder/Architect Charles Whittlesey for the Atchison, Topeka, and Santa Fe Railway

Statement of Significance (in one paragraph)

El Tovar's significance lies in its eclectic architecture--a combination of the Swiss chalet and Norway villa as the promotional brochures boasted--and the way in which that transitional architecture bridged the gap between the staid Victorian resort architecture of the late nineteenth century and the rustic architecture later deemed appropriate for the great scenic and natural wonders of the United States. Interlocked with that significance is the building's importance as the Santa Fe Railway's key structure of its "destination resort" at Grand Canyon which dramatically increased tourism and in turn had an indirect bearing on the area's establishment as a national monument in 1908 and a national park 11 years later.

The Atchison, Topeka, and Santa Fe Railway was following the same course that other railroads were at the turn of the century. By increasing passenger traffic on main lines to the west coast the railroads increased revenues. The demand for rail service to the remote western locations like Yellowstone and the Grand Canyon included a need for accommodating the passengers who had travelled so far. The usual length of stay for vacations at that time varied from several weeks to an entire season. The simple camps that often greeted the visitors before rail service were primitive in comparison with the excellent resorts in the east and on the west coasts. The railroads in promoting passenger traffic to these places also assumed the responsibility of building resorts that enhanced the scenic and natural wonders and provided levels of comfort and even luxury that made the trip particularly noteworthy. The stiff competition between the railroads for passenger traffic and the unique locations each served also created the perfect reasons for pursuing types of architecture synonymous with the image the railroad sought to create.

The concept of large luxury hotels was not new to the United States, but the concept of national parks was. The typical luxury hotel in a resort area in the country at the turn of the century was a large wood-frame building with a sprawling plan with applied Victorian ornament for distinction. The

The dining room, kitchen, and utility wing stretches out from the west end of the building. This wing has stone foundations, log-slab siding, and wood shingle roofs. The two stone chimneys on the north and south sides of this wing are flanked by large picture windows. The porch on the north side is not original and probably dates from the 1950s when the dining room expansion and small cocktail lounge were added.

The interior spaces retain considerable original fabric, although major changes have been made in interior design and cosmetic finishes. The entrance lobby ("Rendezvous Room"), with its log-slab panelling and exposed log rafters, retains its dark, woodsy character resulting from the deep brown stain on the wood. The ridgepole supporting the log rafters is in turn supported by log poles. Trophy heads of moose, pronghorn, elk, and deer hang on the walls, especially above the doorways to the newsstand, the two gift shops, and the registration area. Copper chandeliers hang by chains from the ridgepole. Most areas of wood floor have been finished with a polyurethane varnish, and heavy-traffic areas have been carpeted.

The registration lobby contains peeled log posts with carved corbels that support the floor of the mezzanine lounge above. The mezzanine lounge is an octagonally shaped balcony that overlooks the registration lobby. The balcony railing and those of the surrounding staircases up to the mezzanine and upper floors have balusters jigsawn in a Swiss chalet style. The mezzanine also contains peeled log posts with decorative corbels supporting the beams for the floor above. Hanging from the ceiling of the mezzanine into the registration lobby is a copper chandelier.

The layout of the guest rooms has changed to allow for updating, although the double-loaded corridors remain. Although the fenestration is the same as it was originally on the exterior, the rehabilitation of the hotel in 1983 included the addition of private baths for each guest room. The 95 guest rooms now number 79 because of that change in allocation of space. All of the guest rooms have new carpeting and sheetrock, new baseboard electric heaters, and new doors with higher fire ratings. Some of the guest rooms that have balconies have had sliding glass doors with aluminum frames added for better access and easy maintenance.

The general configuration of the building has changed little

since it was constructed; the biggest changes have been in the building's interior decor. A sprinkler system and new fire escapes have been added to the building. New mechanical systems at the rear (west) of the building are housed in enclosures of log-slab siding. The building underwent a total rehabilitation completed in 1983 that included the removal of all original windows in the upper stories and replacement with thermal-pane windows in a dark brown anodized aluminum. The original windows were paired four- and five-light casements with single-light transoms above, all of wood frame construction. The new casements are single lights with false mullions on the interior.

construction of Old Faithful in Yellowstone in 1903 altered that architectural concept. The architects and the railroads began using structural materials left in their natural state, similar to the rustic buildings of the Adirondacks. The image that those materials projected when used in that way was of a western, frontier, rustic character. Combined with that was the hold-over of romanticism from the nineteenth century that contributed to the way people perceived and experienced these natural and scenic wonders later set aside as national parks.

The Santa Fe Railway's extension of a spur to the south rim of the canyon and the knowledge that image, romanticism, and a taste of the western frontier were selling points, resulted in the need of a major hotel that fulfilled passengers' dreams of the exotic west at that destination resort. The Railway chose one of its talented staff architects as designer of the building--Charles Whittlesey.

Whittlesey was born in Alton, Illionis in 1868. He moved to Chicago when he was young and began studying architecture and engineering there when he was only 16 years old. He practiced in Chicago for 25 years, and then moved to Albuquerque as an architect for the Santa Fe Railway for five years, during which time he designed El Tovar at Grand Canyon, and the Alvarado Hotel in Albuquerque. After that Whittlesey moved to Los Angeles and designed a number of noteworthy buildings including Temple Auditorium, the Wentworth Hotel in Pasadena, and a series of commercial structures. He moved to San Francisco in 1907--a year after the earthquake and fire--and designed more commercial buildings there including the progressive Pacific Building--a reinforced concrete structure considered remarkable for its terra cotta ornament and landscaped interior courtyard.[1] Whittlesey was renowned for his early use of reinforced concrete.

El Tovar opened its doors in January, 1905, as the luxury hotel at the Grand Canyon for the Santa Fe Railway. The building's style remained steeped in the late Victorian predeliction for the exotic with its roof turret and chalet-like balconies and terraces. Whittlesey's use of log-slab siding and log detailing on the first floor created that rustic frontier atmosphere that

the railroad sought. The dark color of the building and the dark interiors contributed to the woodsy ambience. The dark exterior color gave added architectural importance to the building's silhouette--easily distinguishable by its turret and varied roof forms as the most important structure on the south rim by the way it was outlined in the sky.

Over the years El Tovar has housed such dignitaries as George Bernard Shaw, Ferdinand Foch, Gugliemo Marconi, Presidents William Howard Taft and Theodore Roosevelt, and even Arthur Fiedler. Once described as "the most expensively constructed and appointed log house in America" the hotel has retained most of its original character.

GRAND CANYON NATIONAL PARK

16.1480

Hermit Trail (data from registration form, October 25, 2019; 16 pp. plus photos)

(Santa Maria Trail)

Grand Canyon National Park, Arizona. 1911-1930.

Nomination prepared October 25, 2019, Michael F. Anderson, Debra Sutphen, Michael Scott, Grand Canyon, Arizona.

"This nomination was originally prepared by Debra Sutphen and Mike Anderson in May 1990. At the time, Sutphen and Anderson were Research Associates at the Center for Colorado Plateau Studies, Northern Arizona University. The related multiple property listing of Historic Roads and Trails of Grand Canyon Arizona, was prepared by Anderson, in collaboration with Sutphen. The Hermit nomination was revised by Michael Scott, Architectural Technician at the NPS Western Regional Office in San Francisco, in February 2001. It was revised to the present form by Anderson and Zeman in August 2002, with further minor edits completed by Anderson in December 2006."

Summary: "Hermit Trail is a 7.5- mile-long trail starting at the rim of Hermit Creek Canyon at a point eight miles west of Grand Canyon Village and descending 3,600 feet to the Tonto Platform, where it terminates at the site of a former tourist facility, Hermit Camp. The facility was removed by the Santa Fe Railway and National Park Service in 1936. The trail traverses the Kaibab, Coconino, and Supai formations along the eastern wall of Hermit Basin and Hermit Creek Canyon in a northerly direction down to the Redwall formation, where it then drops nearly five hundred feet through the limestone cliffs to the Tonto Platform. The trail then heads in a southerly direction (overlaying today's Tonto Trail) for about one mile, terminating beneath Pima Point at the site of Hermit Camp. The identifying components of Hermit Trail and its associated buildings, sites, and structures are integrated into the natural features of the area. Sections of the trail are paved with riprap and retained by walls built of stone from the Kaibab, Toroweap, and Coconino formations. Portions of the trail and related properties have been altered through use, erosion, and deliberate removal. Despite these changes, Hermit Trail and certain related properties retain their historical integrity.

"Hermit Trail was surveyed in 1909 and built in 1911 and 1912 by the Santa Fe Land Improvement Company, a subsidiary of the Santa Fe Railway. The trail, tourist camp, rest areas, stables, and cottages at the trailhead, and probably a former cabin at Waldron Trail junction, were constructed by the Santa Fe Railway and operated by Fred Harvey to provide inner-Canyon recreation. Hermit Trail was designed to provide safe, comfortable, tourist travel to a relatively elaborate tourist camp complete with tent-cabins, electricity, telephone, and tram service. It was constructed at great expense and with meticulous attention to quality. Extra amenities—rest stops, retaining walls, extra tread width, and reduced grades—were included to provide visitors with the greatest degree of comfort and safety available at Grand Canyon and at comparable wilderness settings nationwide. Hermit Trail became a model after which NPS trail construction was patterned. Today, only the trail and one rest area are intact."

16.1291

Trans-Canyon Telephone Line (listed May 13, 1986; 12 pp. plus photos)

(Emergency Telephone Line)

Grand Canyon National Park, Arizona. 1935, 1938-1939.

Nomination prepared March 1, 1986, Teri A. Cleeland, Williams, Arizona.

At time of nomination, owner of property was listed as “Mountain Bell, Phoenix, Arizona”.

Summary: “The trans-canyon telephone line in Grand Canyon National Park was constructed by Civilian conservation Corps forces in 1935 to facilitate communication between the North and South Rims and from the inner canyon section of the Park. It is significant under criterion A for its association with the National Park Service and Civilian Conservation Corps and because of its importance as a communication link in a remote place. It is also significant under criterion C because the metal telephone poles represent a distinctive method of construction and the open-wire copper-weld line represents a vanishing type of telephone technology. The primary areas of significance for the line are politics/government, engineering, and communications, on a local level.

“The nomination boundary is limited to the poles and wire which constitute the structure. The line begins at the South Rim, terminates at the Colorado River, begins again at the Tipoff and terminates at Roaring Springs.

“The trans-canyon telephone line is located entirely within the Grand Canyon in northern Arizona. It is approximately eighteen miles long and roughly parallels the Bright Angel and North Kaibab Trails from the South Rim to Roaring Springs, with a spur line running two miles up the South Kaibab Trail to the Tipoff. The line consists of a series of 592 metal poles strung with copperweld wire. The poles, installed in 1935 and modified in 1938-1939, are unchanged from their original appearance. Although two small sections of the line have been removed in recent years, the line overall possesses a high degree of integrity.

“It runs from rim to river, descending nearly a mile from pine forest to desert. Over most of the way, the terrain is rough and rocky, with many steep cliffs; the landscape is generally desert-like, with sparse forest vegetation toward the rims. From the south, line begins in the vicinity of the Bright Angel Lodge. It descends one thousand feet down steep cliffs alongside the cross-canyon water line to Mile-and-a-Half Resthouse on the Bright Angel Trail, where an emergency telephone is located. The line drops another thousand feet in elevation on the east side of the trail to Three-Mile Resthouse, which also has an emergency telephone. After descending the Redwall escarpment, the line continues north to Indian Gardens. The ranger station there has a telephone extension. Below Indian Gardens, the line runs alongside the original Bright Angel Trail down Salt Creek Canyon to Pipe Creek. The line then rejoins the present trail and terminates at the River Rest House on the Colorado River, which has an emergency telephone. The other section of the line begins at the emergency telephone located at the Tipoff, above the Inner Gorge on the South Kaibab Trail. It drops about twelve hundred feet to the east side of the Kaibab Suspension Bridge, where it crosses the Colorado River, and runs along the North Kaibab Trail to Phantom Ranch. Here it serves both the National Park Service and Fred Harvey facilities. The line continues north alongside the trail to Cottonwood Camp, where the ranger station has an extension. It continues north for another two-and-a-half miles to Roaring Springs, the source of water for both rims, where it terminates.”

16.1415

Cross Canyon Corridor Historic District (68 pp.)

Grand Canyon National Park, Arizona; 36 contributing buildings, 2 contributing sites, 25 contributing structures, 3 contributing objects; 42 noncontributing buildings, 33 noncontributing structures, 2 noncontributing objects. 1890-1942.

Nomination prepared March 6, 2013, Greta Rayle and Helana Ruter, Logan Simpson Design, Inc., Tempe, Arizona.

Summary: "The Cross Canyon Corridor Historic District encompasses approximately 485 acres and lies within the boundaries of the Grand Canyon National Park located on the Colorado Plateau of northern Arizona. The district encompasses four continuously maintained hiking trails—the Bright Angel Trail, South Kaibab Trail, Colorado River Trail, and North Kaibab Trail. The trails span the Grand Canyon from the North and South Rims and cross the Colorado River at the terminus of the South Kaibab Trail and a bridge crossing along the alignment of the Colorado River Trail. The district is also comprised of six developed areas adjacent to these trails. These areas include: Indian Garden, Phantom Ranch and the Bright Angel Creek Delta, Yaki Point (also known as the South Kaibab Trailhead), Roaring Springs, Bright Angel Campground, and Cottonwood Campground. Contributing resources situated within the district boundaries consist of 36 buildings, 25 structures, 3 objects, and 2 sites, one of which represents the broader landscape which includes elements reflective of circulation features, clusters, small scale features, cultural traditions, topography, archaeological sites, and water features. Non-contributing resources consist of 75 buildings and structures and 2 objects that were constructed after the period of significance or have undergone modern renovations or substantial modifications and no longer retain sufficient integrity to contribute to the Cross Canyon Corridor Historic District."

16.1416

Bright Angel Trail (41 pp. including photos)

(Bright Angel Toll Trail; Cameron Trail)

Grand Canyon National Park, Arizona; 7 contributing buildings, 3 contributing sites, 1 contributing structure, 8 noncontributing buildings; 90 acres (trail, 41 acres; 3 rest shelters, 4.5 acres; Indian Gardens, 44.5 acres). 1890-1941.

Nomination prepared June 30, 1992, Mike Anderson and Debra Sutphen, Northern Arizona University Center for Colorado Plateau Studies.

Summary: "Hunter-gatherers, Cohoninas, Anasazis, and Havasupais used the route availed by the Bright Angel Fault for millenia [*sic*] before the first European-Americans visited Grand Canyon. Abundant archeological evidence and a few historical accounts attests to this early use."

"More than any other Grand Canyon trail, the Bright Angel reflects a series of major reconstructions such that today's trail hardly resembles that constructed by Pete Berry, Ra;[j Cameron, and others in 1890-91 and 1898-99. In the late historic period, the National Park Service and Civilian Conservation Corps (CCC) reconstructed the trail for nearly its entire length, and changed the route in several segments to follow adjacent drainages. The later version of the trail completed in the 1930s is the one nominated for the national register. However, the original trail constructed during the above years and serving through the late 1920s is described since the more significant aspects of the identified historic contexts occurred during this period of use."

"The Bright Angel Trail fulfills two of the four National Register criteria as follows: A. The trail is significant under Criterion A for its role in the political debate involving public versus private control at Grand Canyon. The initial salvos fired in the battle for Grand Canyon control came less than a year after the arrival of the Grand Canyon Railway, and centered on ownership of the Bright Angel Trail. Although this conflict eventually spread to all sections of the Canyon, the most heated debate focused on this one trail through the 1920s, long after most skirmishes in more remote sections of the park had ended."

"B. The Bright Angel Trail is significant under Criterion B for its association with Ralph Henry Cameron."

16.1481

South Kaibab Trail (data from registration form, October 25, 2019; 18 pp. plus photos)

(Yaki Trail; Yaqui Trail)

Grand Canyon National Park, Arizona. 1919-1940.

Nomination prepared October 25, 2019, Michael F. Anderson,Jamie M. Donahoe, Debra Sutphen, Armanda Zeman, Grand Canyon, Arizona.

"This nomination is a revision of a form origninally researched, written and prepared by Debra Sutphen, dated April 30, 1991. At the time, Ms. Sutphen was a Research Associate at the Center for Colorado Plateau Studies, Northern Arizona University. The related multiple property listing of Historic Roads and Trails of Grand Canyon, Arizona, was prepared by Mike Anderson, also research associate of the same organization. This nomination was revised by Jamie Donahoe of the Western Regional Office in February 2001, and again revised by Anderson (now GCNP Trails Historian) and Zeman, historical architect, in August 2002."

Summary: "The South Kaibab Trail is a man-made, semi-primitive path, 6.48 miles long, which descends 4,860 feet in elevation from a point approximately four miles east of Grand Canyon Village on the south rim of the Grand Canyon to the south end of the Kaibab Suspension Bridge, approximately 75 feet above the Colorado River. The trail may be located on the fifteen-minute USGS map entitled "Bright Angel, Arizona." The trail was named to commemorate the adjacent Kaibab National Forest."

"The South Kaibab has been described as a "trail in a hurry to get to the river." This statement is by no means simply intriguing prose, though it may have been intended as such. The South Kaibab was surveyed, designed, and built by the National Park Service (NPS) to provide fast, efficient access to the Colorado River. To meet these criteria, much of the trail was excavated from the Canyon walls by laborers armed with dynamite, compressed air drills, and jackhammers. Efficiency, safety, and comfort for future travelers were prime considerations in the building of the South Kaibab Trail. The trail was designed to enhance the visitor's overall experience in the Grand Canyon, but was not designed to specifically add to or detract from that experience; it was and continues to be a strictly utilitarian access artery. Its early and continuing popularity as one of the most extensively used trails in Grand Canyon National Park attests to its successful fulfillment of these purposes."

"Yaki Point, near the trailhead, is the staging area for mule trains that use the South Kaibab Trail pack in supplies to Phantom Ranch and NPS facilities in the Inner Canyon. The buildings at Yaki Point were built by both Fred Harvey and the National Park Service in 1926-29. They are closely associated with the construction of, and operations along, the South Kaibab and are therefore included in this nomination."

GRAND CANYON NATIONAL PARK

(Grand Canyon Village)

16.1292

Buckey O'Neill Cabin (listed October 29, 1975; 5 pp. plus photos)

(Buckey O'Neill Lodge)

Grand Canyon, Arizona; 1 building, 0.01 acre; 36° 03′ 24″ N, 112° 08′ 32″ W. 1890s.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

At time of nomination, owner of property was listed as "Fred Harvey, subsidiary of Amfac Corp, Grand Canyon".

Summary: "This structure is approximately 35′ × 20′ and is made of round logs. There is a field stone chimney at the west end of the cabin. The gable ends are board and batten, as they originally were. In exterior appearance, the cabin probably appears today much as it did when first constructed. Today, there are two front entrances, giving access to the two rooms into which the cabin has been divided. These two entrances are apparently original. The chinking between the logs was probably originally mud; today the chinking is cement. A row of cabins, similar in style, has been built onto the south wall of the O'Neill cabin, and the group is called the Buckey O'Neill Lodge."

[See facsimile reproduction of this nomination form at the beginning of this Appendix] 16.1293

El Tovar (listed September 30, 2013; original listing 1974; 10 pp. plus photos)

(El Tovar Hotel)

Grand Canyon, Arizona; 1 building; 4.07 acres. 1905-Present.

Nomination prepared 1986, Laura Soullière Harrison, Santa Fe, New Mexico.

At time of nomination, owner of property was listed as "Fred Harvey, subsidiary of Amfac Corp, Grand Canyon".

Summary: "El Tovar is a large hotel built twenty feet from the very edge of the south rim of the Grand Canyon. The building's foundation is rubble masonry and concrete. The superstructure is of wood frame construction. The first floor is sheathed with log slab siding complete with finely-honed corner notching that gives the appearance of log construction. The upper stories have rough weatherboards. Log-slab moldings surround the windows on the first floor; those on the upper stories have heavy, milled moldings."

Boundary Description (see map on net page): "The irregularly shaped boundary begins at the curb at the southeast side of the entrance drive up to El Tovar and proceeds along that curb in a northwesterly direction to the front of Hopi House (Bldg. 545), then northwest 150 feet to the Canyon Rim, then along the rim to a point 100 feet northwest of the northwest corner of El Tovar, then south-southeast 275 feet to the curb north of Colter Hall (Bldg. 53), then east along the curb 75 feet, then south-southeast 100 feet to the north edge of North Village Loop Drive, then easterly along [to] the starting point."

boundary

16.1294

Grand Canyon Depot (listed September 30, 2013; original listing 1974; 8 pp. plus photos)

Grand Canyon, Arizona; 1 building. 1909-Present.

Nomination prepared 1986, Laura Soullière Harrison, Santa Fe, New Mexico.

Summary: "The Grand Canyon Depot is a log and wood-frame structure with a central section two-and-a-half stories in height and wings to the east and west each one-and-a-half stories. The building's foundation is concrete. The gable roof of the two-story section runs on a north-south axis, and those of the wings on an east-west axis. The intersecting gable roofs are finished with green-painted asbestos shingles. The south gable end frames the Santa Fe logo near the ridge, with the identifying 'Grand Canyon' name below in green copper letters. Centered below that on the first floor is a log bay projecting out from the building's mass, sheltered by a small gable roof. Another Santa Fe logo is centered in this gable end. The baggage loading platform and baggage room are at the east end of the building. The waiting platform and ticket booth are at the west end. The front elevation faces south and ovelooks the remaining tracks."

16.1295

Grand Canyon Park Operations Building (7 pp. plus photos)

(Grand Canyon Ranger Office)

Grand Canyon, Arizona; 1 building; less than 1 acre. 1929.

Nomination prepared 1986, Laura Soullière Harrison, Santa Fe, New Mexico.

National Park Service property.

Summary: "The Grand Canyon Park Operations Building is a two-story stone and wood-frame structure of classic rustic design. The building is one of the key park service structures comprising the Grand Canyon Village Historic District which is listed in the National Register of Historic Places. The park operations building is subdued in its architecture when compared with the more outlandish concessions structures built at the Canyon by the Santa Fe Railway, but its fine design shines through in the strength of its architecture."

16.1296

Grand Canyon Power House (8 pp. plus photos)

Grand Canyon, Arizona; 1 building. 1926.

Nomination prepared 1986, Laura Soullière Harrison, Santa Fe, New Mexico.

National Park Service property.

Summary: "The Grand Canyon Power House is the work of a brilliant (and at this point anonymous) architect. The stucture is an industrial building in a national park that was constructed in an appropriate style and with appropriate materials. These aspects are interesting but not unique. What is unique about the building is that the architect used multiple techniques of illusion to scale down the massive structure and make it look about half the size that it really is. The building's significance is further enhanced by the extant original equipment used to provide power to the entire development at the south rim of the Grand Canyon. All of it remains in the building; the switches were simply turned off when an alternate source became more economically viable. The Power House was built in 1926 to supply power and steam heat to the Fred Harvey/Atchison, Topeka & Santa Fe facilities on the south rim of the Grand Canyon, and to provide steam heat for the railway passenger cars parked in the Grand Canyon railroad yards. The building was designed in a Swiss chalet style, compatible with El Tovar a short distance away and with most of the other Fred Harvey Company buildings in the vicinity. The use of local stone as the predominant material on the building's exterior linked it further with its natural setting and with its architectural setting. Stone of similar color was used as a primary building material in many of the National Park Service buildings on the south rim."

Original Nomination 16.1297

Grand Canyon Village Historic District (listed November 20, 1975; 24 pp. plus photos)

(Grand Canyon Village)

Grand Canyon, Arizona; 39 buildings; 73.05 acres. *Ca.* 1890-Present.

Nomination prepared May 10, 1975, Gordon Chappell, San Francisco, California.

Summary: "The Grand Canyon Village Historic District consists of a core area of buildings ranging in date from the 1890s to the mid-1930s, beginning along the south rim of the canyon at Verkamp's on the east and extending to Kolb's Studio on the west, stretching south from the rim of Grand Canyon into the ravines and hills south of the rim. The only twp_ significant modern, intrusions within the district are Thunderbird and Kachina Lodge buildings, administratively a part of Bright Angel Lodge, built in 1968 and 1971 respectively. The rest of the buildings in the district, and the district itself, is relatively unchanged from the mid-1930s, with many individual buildings virtually unchanged from much earlier years. Almost all of the buildings have been in continual use since construction, and all have undergone the minor alterations which such use entails, hence the specification as "altered" in the categories abovej but the alterations are minor in character and have not changed the basic characteristics of appearance of of these structures. Further back from the rim, south of the boundary of this historic district, and also east of the district but back from the rim, lie the many more modern buildings erected during the Mission 66 program by the National Park Service, the modern Yavapai Lodge, and others. Most are some distance removed from and screened by trees from the historic district, and do not intrude upon the historic scene."

Structures included in the historic district (names as listed in the nomination): Verkamp's Canyon Souvenir Shop, Hopi House, El Tovar Hotel, Buckey O'Neill Cabin, Lookout Studio, Kolb Brothers' Studio, Red Horse Station/Cameron Hotel/Old Grand Canyon Post Office, Superintendent's Residence/First Administration Building (First Park Headquarters), Grand Canyon Operations Building/Second Administration Building (Second Park Headquarters), Grand Canyon Railroad Station, El Tovar Stables and Blacksmith Shop (three buildings), Grand Canyon Power House, Grand Canyon Post Office, Apache Stree Residences, Rangers' Dormitory.

Also noted: "Buildings within the boundaries of the historic district but not at present adjudged individually of sufficient level of significance to merit National Register nomination are as follows: Bright Angel Lodge and cabins, excepting Buckey O'Neill Cabin and Red Horse Stage Station mentioned above, the remainder being built mostly in 1934-35; Colter Hall (Fred Harvey employees' Formitory), built in 1937 originally as a dormitory for women employees only; a small railway service structure next to the tracks a short distance west of the depot, built in 1950; the Fred Harvey Laundry, built in 1927 west of the Grand Canyon Power House; the Fred Harvey Maintenance Building, built in 1931 immediately south of the Fred Harvey Laundry; all garages and storage sheds behind residences on both sides of Apache Street, built c. 1924-30; Thunderbird and Kachina Lodge Buildings of Bright Angel Lodge, built in 1968 and 1971 respectively, which at this date constitute intrusive modern elements."

Expanded Nomination 16.1298

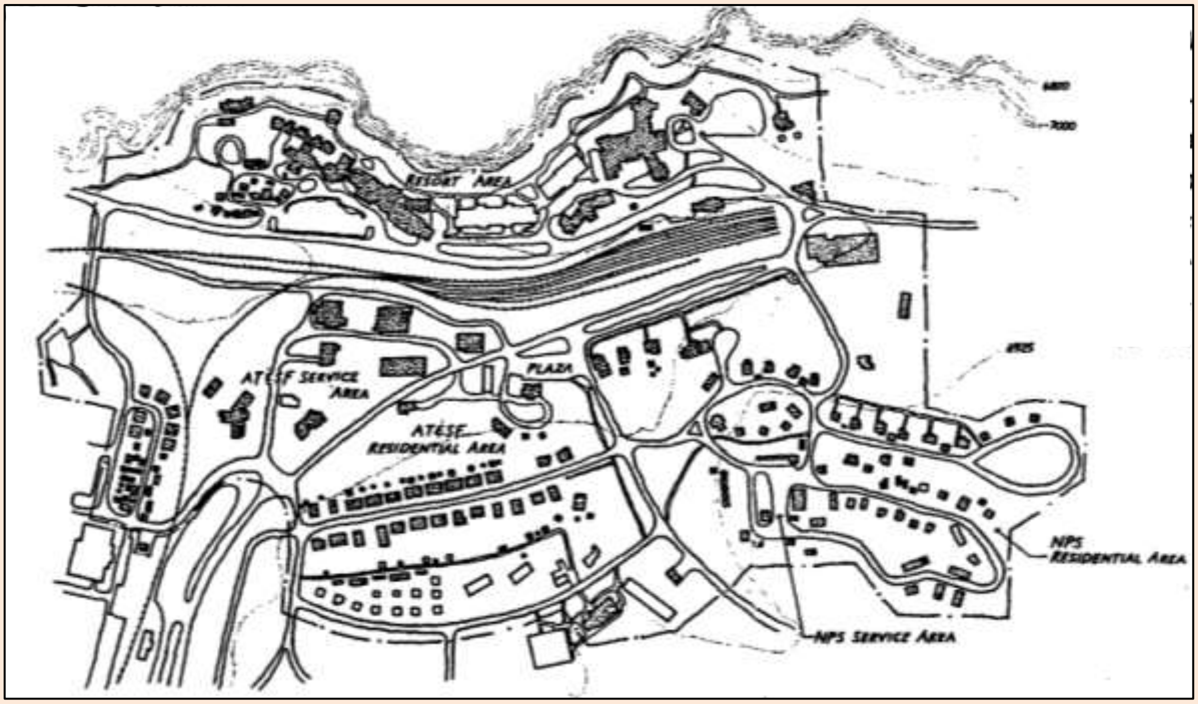
Grand Canyon Village (listed October 24, 1995; 65 pp. plus photos)

(Grand Canyon Village Historic District)

Grand Canyon, Arizona; contributing resources 147 buildings, 3 sites, 44 structures; noncontributing resources 18 buildings, 4 structures; 125 acres. 1896-1942.

Nomination prepared August 28, 1995, Michael P. Scott, San Francisco, California. "This document is an update of the nomination prepared by James W. Woodward, Jr. of Janus Associates, Inc. . . . Phoenix, AZ. A number of individuals at the Western Regional Office, Division of Park Historic Preservation assisted in this update, including: Gordon Chappell, Regional Historian; Robbyn Jackson, Acting Regional Historical Architect; Jamie Donahoe, Historian."

Summary: "The Grand Canyon Village Historic District is located within Grand Canyon National Park adjacent to the south rim of the Grand Canyon, approximately five miles north of the park's southern boundary. The historic district was first entered into the National Register of Historic Places on November 20, 1975. The original nomination included 39 buildings and was amended in 1982 to include the Bright Angel Lodge, which added 25 more buildings to the listing. The current nomination is an expansion of the original nomination, as amended, and encompasses the majority of the original village site and includes a collection of 269 buildings, 42 landscape structures and 3 sites directly related to early tourist development at the South Rim and the subsequent development of the village in accordance with the original National Park Service (NPS) master plan. (See corresponding map.) Three contributing sites are included in the Grand Canyon Village Historic District. The Maswick Amphitheater site is located at the far west end of the district, within the main district boundary. The Brant Cemetery and the Grand Canyon Pioneer Cemetery are discontiguous sites whose locations are marked on the accompanying topographic maps."



National Landmark Nomination; Boundary Change 16.1299

Grand Canyon Village (67 pp. plus photos)

Grand Canyon, Arizona; contributing resources 212 buildings, 1 site, 44 structures; noncontributing resources 35 buildings, 11 structures; approximately 123 acres. 1897-1942.

Nomination prepared September 13, 1996, Michael P. Scott, Gordon Chappell, Robbyn Jackson, Jamie Donahoe, Susan Begley, and Ethan Carr, San Francisco, California.

Summary: "The Grand Canyon Village National Historic Landmark (NHL) District is located within Grand Canyon National Park adjacent to the south rim of the canyon, approximately five miles north of the park's southern boundary. The historic district was first entered into the National Register of Historic Places on November 20, 1975. The original nomination included 39 buildings. It was amended in 1982 to include the Bright Angel Lodge, which added 25 buildings to the total. The nomination was further amended in 1995, when the boundaries of the district were enlarged to encompass the entire historic village area. The total number of buildings in the enlarged district became 247, and 55 landscape structures and 3 sites were described. The current National Historic Landmark Nomination describes the same district boundaries as the existing National Register district and encompasses the same number of buildings and structures. Two discontiguous sites of the National Register district, which are cemeteries, do not relate directly to the theme of Park Service landscape architecture, and so are not included in the NHL District.

"The setting of the NHL District is dominated by the south rim of the Grand Canyon and the adjacent Coconino Plateau forests of Ponderosa pine, pinion, and juniper trees. The district conveys a strong sense of architectural unity, as most of the buildings are of the 'NPS Rustic' style. The district possesses a high degree of integrity relative to the original street plan, organization of developed areas, and overall setting. The vast majority of resources date to the 1920s and 1930s and alterations to historic structures are minor.

"The most important impact on the integrity of the historic town plan overall has been the reorientation of arriving automobile traffic from a southern approach to an eastern approach, which was done in the 1960s as part of the development of the new visitor center and other facilities to the east of the historic district. The town's plaza, originally an arrival point at the center of the plan, no longer serves that function because of this change. The plaza itself retains physical integrity, however, since the space itself is intact. The historic civic buildings around it are in excellent condition (although the old Babbitts' Brothers store burned to the ground in 1995). The alteration to the overall circulation in the district has changed the sequence of spaces for most arriving visitors; but the plaza does retain its physical integrity and therefore is part of the historic district."

16.1300

Horace M. Albright Training Center (listed September 30, 2013; 35 pp. including maps and photos)

(Albright Training Center, Kowski Hall and Student Residences)

Albright Avenue and Center Road, Grand Canyon, Arizona; 6 buildings; 10 acres. 1961-1966.

Nomination prepared May 2010, Rodd L. Wheaton, Englewood, Colorado.

Summary: "The Horace M. Albright Training Center (Albright Training Center) is the western facility of the National Park Service's employee training operations. It is located on the South Rim of Grand Canyon National Park on the northwest corner of Albright Avenue at the intersection of Center Road. Albright Training Center includes Kowski Hall, the classroom and administration center, and five Student Residence dormitories that were all built during the National Park Service's Mission 66 construction program (1956-1966). The Modernist style, one-story, gabled roofed Kowski Hall has many of the design attributes of the Park Service's visitor center construction program from the same era. The building, dedicated October 26 , 1963, was enlarged in 2001-2006 with an architecturally compatible southwest wing to provide additional office space; it is separated from the original building with a hyphen connector. The interiors of Kowski Hall were totally removed and reconstructed at the same time. Located west of Kowski Hall, the five nearly identical dormitories, Student Residence Buildings, A through E, provide studio units for students and two staff apartments, as well as a registration office. The two-story, gabled roof dormitories have continuous porches on each elevation providing access to the front and rear entrances of the individual units. Buildings A and B were constructed with Kowski Hall in 1962-1963, Building C was built one a year later, and Buildings D and E were built in 1965. All of the dormitory interiors were totally reconfigured in 2001-2006 to create the studio units and to improve the lounge-recreation spaces of Building D. At the southeast façade of Kowski Hall, a curved driveway extends from Albright Avenue and connects to parking along the southeast end elevations of the dormitories. Concrete walkways edged with stone block curbing edge the original driveways and new concrete paved walkways provide pedestrian access through the site that retains the native vegetation of the South Rim of Grand Canyon.”

16.1301

Ranger’s Dormitory (listed September 5, 1975; 4 pp. plus photos)

Grand Canyon, Arizona; 1 building; 1 acre; 36° 03′ 14″ N, 112° 08′ 22″ W. 1921.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

Summary: “Apparently built in 1921, as a dormitory for workers at Grand Canyon National Park, and sometime prior to 1927, it became a Ranger’s Dormitory. Later, it was used as nurse’s quarters and for a short period in recent years, it was a clinic. It has been returned to a Ranger’s Dormitory and is used today to house unmarried seasonal rangers. Little else is known about the history of this structure.”

16.1302

Stables—Blacksmith Shop Complex (listed September 6, 1974; 5 pp. plus photos)

(El Tovar Stables)

Grand Canyon, Arizona, off route 8A; 3 buildings; 7 acres; 36° 03′ 20″ N, 112° 08′ 28″ W. 1904.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

At time of nomination, owner of property was listed as “Fred Harvey, subsidiary of Amfac Corp, Grand Canyon”.

Summary: “This complex is composed of the three following structures, all probably erected about the same time:

“1. Horse Barn or Stable: This structure has changed little over the years. It has, however, apparently been shortened at one end by about 40 feet; the cause, reportedly, was a fire. This structure is approximately 140′ long and 60′ wide. It has a concrete foundation, and the lower exterior half of the barn is board and batten, while the upper half is shingle. The roof is covered with green asphalt shingles. A steeple-like cupola rests in the center of the roof. There is a single huge sliding door at each end of the structure. At the west end, there is a corral, the rails of which are V iron pipes. Mules are penned there now. The interior of the barn is divided into two parts. The east half is used for storage and is open to the roof. Originally, it was probably the wagon room. There are two smaller rooms, one formerly used as a saddle shop and the other as a leather shop; today, they are both used for storage. The other half of the barn has two floors. The upper floor is used to store hay and grain. A wood chute leads from this floor to each of the feed bins or mangers. A huge box was built onto this floor to hold the grain. There are also three rooms on this floor, and they were formerly used as storerooms. This whole upper floor was once shite-washed [*sic*]. The first floor of this half of the barn contains the stalls and mangers. On one side, are open stalls and on the other are closed stalls, reminders of the days when horses were stabled here.

“2. Mule Barn: This is smaller, but similar in architectural style to the Horse Barn. Its overall dimensions are approximately 90′ x 60′. It, too, has a concrete foundation, and a board and batten exterior to about half-way up with a shigle siding the rest of the way. The roof is green asphalt shingles and is crowned by a low, less pretentious cupola. Each end of the barn contains two large sliding doors. The east end of the barn has an adjoining double corral, the railings of which are 4″ iron pipe. The barn has two floors. The upper floor holds the hay, and, as in the Horse Barn, there is a large grain bin. Chutes feed hay and grain to the mangers in the stalls on the first floor, of the barn are enclosed, but have open ends. The stalls on both sides of the barn are enclosed, but have open ends.

“3. Blacksmith Shop: This ‘L-shaped’ board structure is on a concrete foundation. It is roughly 50′ long and 25′ wide with the L-end extending the front of the building an additional 35′. The exterior, like the barns, is board and batten about half-way up and wood shingle the rest of the way. The roof is also green asphalt shingles. The interior walls are made of heavy horizontal boards. The building is divided into three rooms. Two at the west end were apparently paint and carpenter shops, but are today used for storage. The large east room is where the blacksmithing equipment is. There are two forges in this room. The older one, not now used, is an open type with a canopy vent over it. The newer one, enclosed on three sides, is made of bricks. Scattered about, are various blacksmith tools. The shoeing area has a heavy wood floor, and for fractious mules or horses, two heavy wooden stocks swing from the wall to bind the animal during the shoeing process.”

16.1303

Superintendent’s Residence (listed September 6, 1974; 4 pp. plus photos)

(First Administration Building)

Grand Canyon, Arizona, off route 8A; 1 building; 1 acre; 36° 03′ 22″ N, 112° 08′ 05″ W. 1921.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

Summary: “Originally, this was a small, L-shaped structure of two stories. The bottom floor was of stone while the upper floor had a wood exterior. In 1931, the building was remodelled and enlarged, and converted into a residence. The addition maintained architecturally and structurally the same style, which is a cross between early National Park Service and Swiss chalet. The upper floor, today, has eight rooms, and, the old portion of the house is easily identified by its random width oak flooring. The new portion is also oak, but its boards are of narrow width. The upper portion has the living room, dining room, kitchen, and the usual assortment of bedrooms and baths. There is a stone fireplace in the living room and one in the dining room. Another addition in 1931 was a porch and enclosed entrance way into the living room, making the main access way into the house. Downstairs is the basement-like area which contains a large family room (the old visitor information office) with another stone fireplace. A labyrinth of corridors and rooms connect to a two-car garage. Half the garage is now occupied by a heating plant, The walls of the basement are stone with plaster over those in the living area. The upstairs walls are lath and plaster.”

GRAND CANYON NATIONAL PARK
(South Rim, outside of Grand Canyon Village)

[Listed Geographically West-to-East]

16.1304

Hermit's Rest Concession Building (listed August 1, 1974; 4 pp. plus photos)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona; 1 building; 6 acres. 1914.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

At time of nomination, owner of property was listed as "Fred Harvey, subsidiary of Amfac Corporation".

Summary: "This building, designed by Mary Jane Colter, was erected in by the Santa Fe Railroad at the head of Hermit Trail and at the end of West Rim Road to provide refreshments for Grand Canyon visitors who rode the tour stage out to the end of West Rim Road, to Hermits Rest. It is, today, primarily a curio shop and viewpoint. Its significance stems in part from some of its unusual architectural features. This stone and log structure with its porch or veranda that affords a good view of the canyon, blends in well with its setting due in part to its design and in part to the color of the native stone and logs used in its construction. The chief architectural feature of the structure, though, is the gigantic, recessed fireplace and the huge sitting area where tourists warmed themselves in cold weather. More significance, however, derives from the structure's long use as a concession building. It illustrates a phase of the concession-tourist history at Grand Canyon National Park."

16.1305

Orphan Lode Mine (listed August 1, 1974; 60 pp. plus photos)

(Orphan Mine)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona; 2 buildings, 22 sites, 17 structures, 8 objects; original survey (1905), 20.26 acres; resurvey (1961), 20.64 acres. 1953-1969.

Nomination prepared May 28, 1993, Harlan D. Unrau, Denver, Colorado.

Summary: "Located on the south rim of the Grand Canyon in Grand Canyon National Park, Arizona, the Orphan Lode mining claim is a 20.64-acre (original 1905 survey measured 20.26 acres but resurvey in 1961 measured 20.64 acres) site approximately 2-1/2 miles west of Grand Canyon Village and several hundred yards north of West Rim Drive between the Maricopa Point and Powell Memorial viewing areas. The mining claim consists of approximately 5-6 acres on the rim, the remainder extending down the precipitous and desolate canyon walls to the north end of the claim some 1,100 feet below the rim. Located and filed in 1893 and patented in 1906, the mine yielded minimal amounts of copper and traces of gold and silver during the next 45 years. Because of its unprofitable production, a 2-3 acre section in the southwest corner of the claim on the rim was developed and operated as a tourist resort facility between the late 1930s and the mid-1960s. All of the structures associated with this building complex were razed by the National Park Service in 1967-68. The discovery of anomalous radioactivity on the property in 1951 led to speculation that the Orphan Mine contained uranium deposits. As a result of exploration and development of the claim between 1953-69, the Orphan Mine achieved its greatest period of significance, becoming one of the leading producers of high-grade uranium ore on the Colorado Plateau and of some of the richest uranium ore in the United States.

"With the possible exception of remnants of an early trail from the rim to the lower mine workings and portions of several adits in the lower workings there are no known extant resources on the claim that date from the pre-1950s mining operations. The extant features on the rim, which date from the uranium mining period, include an 80-foot-high steel headframeover the mine shaft and associated surface structures/foundations/debris in a fenced enclosure covering slightly less than 3 acres in the southeast corner of the claim. Most of the buildings in this enclosure were razed by the National Park Service in 1987. A series of extant remnant foundation and superstructure elements and a surviving hoist house, all associated with an aerial tramway that operated between the rim and the lower mine workings during the mid-to-late 1950s, dot the steep canyon walls on the claim. The lower mine workings include several structures and two adits approximately 150 feet uphill and to the southeast of the extant lower tramway terminal remains, an ad it leading to the mine shaft, and the so-called 'glory-hole' near the north edge of the claim. Portions of the three adits may date to the late 19th or early 20th centuries.

"The Orphan Lode Mine property has been abandoned since 1969. While many of the structures, buildings, and objects associated with the mine have either been razed or removed and many of its extant remains are in a state of significant deterioration, the mining property, as a whole, retains a fair degree of integrity since the principal elements of its operation during the 1950s and 1960s remain intact and visible. Each of the 45 extant resources on the claim was present during the uranium mining period from 1953 to 1969 when the Orphan Mine achieved its documented significance and thus contribute to the overall historical significance of the property."

Water Disposal Plant (listed September 6, 1974; 4 pp. plus photos)

(Water Reclaim Plant)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona; 37 acres. 1924.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

Summary: "This plant is composed of a number of related structures, and its appearance is essentially the way it has been over the years. (The Water Disposal Plant is classified as a historic district in order to include the inter-connecting series of tanks, basins, and facilities, ewen though it varies from the normal description of a historic district, that of numerous separate buildings.)

"The South Rim of Grand Canyon, where most of the tourist developments have traditionally been, possesses little water. To help augment the available supply of fresh water, the Santa Fe Railroad, then principal concessioner of the park, developed a plant to reclaim waste water. This reclaimed water was to return by its own pipeline to the hotel area where it would be used to water grass and plants, to flush toilets in the El Tovar Hotel, for train steam engines, etc. The plant was built and put into operation in May 1926, and since then has served well, supplying reclaimed water at nearly one- sixth the cost of obtaining fresh water. Although tests have proved the reclaimed water to be potable, it has never been used for drinking purposes. With the building of the Bright Angel Lodge in 1934, the Water Reclaim Plant was expanded with the addition of the third aeration tank. This plant has been in continuous operation with no serious breakdowns since it was first started, and much of the equipment and machinery is original. Moreover, this plant, basically simple in operation, has proven conclusively that reclaiming water is economically feasible. The significance of this plant lies partly in the fact that it helped solve a major problem (water shortage) in the development of Grand Canyon National Park, and the fact that it is one of the earliest water reclamation plants in the country. Moreover, the scientific principles operating this plant are basically the ones used in today's water reclaiming systems."

16.1307

Grandview Mine (listed July 9, 1974; [incomplete nomination form seen], plus photos)

(Last Chance Mine; Canyon Copper Company Mine)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona; 62 acres. 1892-1907.

Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

Summary: "The Last Chance Mine was located on Horseshoe Mesa by Pete Berry, a prominent local pioneer, who later owned the Grandview Hotel. He built the 4-mile Grandview Trail down to the copper mine, located 3,000 feet below the canyon rim, in 1893 and began hauling the ore out by mule, each animal carrying 200 lbs. and making a round trip and a half each day. Although the ore was over 70% pure copper and won a prize at the Columbian Exposition in Chicago, the mine did not prove profitable, and in 1901, Berry and his partners sold the mine to the Canyon Copper Company. This company operated the mine until 1907 when it no longer proved profitable. A few years later, William Randolph Hearst acquired the property and in 1940, he sold it to the National Park Service."

16.1308

Tusayan Ruins (listed July 10, 1974; 4 pp. plus photos)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona; 10 acres. 1200 C.E.

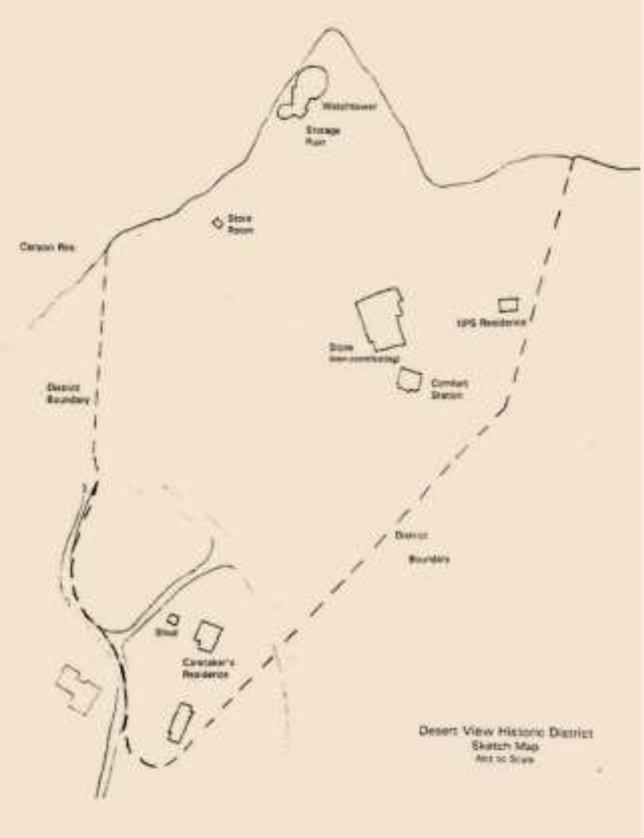
Nomination prepared August 31, 1972, F. Ross Holland, Jr., Denver, Colorado.

Summary: "This pueblo was built sometime around 1200 A.D., and occupied for about 50 or 60 years. The people who occupied it are generally classed as being in the Pueblo II period. This site was excavated in 1930 by the gila Pueblo of Globe, Arizona. Emil W. Haury supervised the dig. The walls were stabilized in 1948 by the National Park Service and again in 1965. In its preserved state visitors can walk around the stabilized walls, which are a foot or so high of [*sic*] the living quarters, storage room and the kivas . . . ."

16.1309

Desert View Watchtower Historic District (listed January 3, 1995; 23 pp. plus photos)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona; 4 contributing buildings; 6 buildings and 1 structure non-contributing; 16 acres. 1930-1941.



Nomination prepared August 29, 1994, Jamie M. Donahoe, San Francisco, California. "This form is a revision of a form researched and prepared by Gordon Chappell, Regional Historian, National Park Service, Western Regional Office, San Francisco in August 1985. Considerable assistance was also provided by Doug Brown, Division of Professional Services, Grand Canyon National Park."

District Boundary: "Beginning at the Desert View Watchtower, set on the rim of the canyon, the boundary follows the rim of the canyon north and then east along the 7440′ contour line to a point where the rim turns southeastward. From that point, proceed in a straight line almost due south, to the 7462′ contour line. At that point, proceed WSW in a straight line until intersecting with the junction of park maintenance roads, just south of Building 149. Follow the north edge of the maintenance road to the 7488′ contour line. From that point proceed N in a straight line to the rim of the canyon at the 7460′ contour line, then along the rim of the canyon back to the Desert View Watchtower."

District embraces Desert View Watchtower (previously designated), "The Ruin" (previously designated), "The Storeroom" (previously designated), Comfort Station/Visitor Contact Station; Fred Harvey Caretaker's Residence; Shed; National Park Service Residence. *(Regarding previously designated buildings, see herein under Mary Jane*

Colter Buildings [Grand Canyon Village].) Non-contributing structures: Fred Harvey Deli; Babbitt's Store; Building 149; Building 915; New comfort station; Other tanks and outbuildings; Limestone Curbs.

16.1338

NATIONAL HISTORIC LANDMARK NOMINATION

[*Listed herein with South Rim sites because a commemorative plaque has been placed at Desert View, and specific location data are redacted in the nomination.*]

1956 Grand Canyon TWA-United Airlines Aviation Accident Site (listed June 11, 2014; 32 pp. plus photos) [redacted]

(Grand Canyon National Park Archaeological Site AZ:C:13:0755)

Grand Canyon National Park, vicinity of Grand Canyon, Arizona [eastern Grand Canyon National Park]; 1,332 acres. 1956.

Nomination prepared February 10, 2011; Ian Hough, Grand Canyon, Arizona; Benjamin Carver, Flagstaff, Arizona; Susan Ciani Salvatore, Washington, D.C. (Alexandra Lord and Susan Cianci Salvatore, eds.).

Summary: "The 1956 Grand Canyon United-TWA Aviation Accident Site meets National Historic Landmark Criterion 1 for its association with the modernization of America's aviation airways. On June 30, 1956, a Trans World Airlines Super Constellation L-1049 and a United Air Lines DC-7 collided in uncongested airspace 21,000 feet over the Grand Canyon in Arizona, killing all 128 people onboard the two flights. Regarded as an important watershed in aviation history, the accident dramatically accelerated movements to address an airway crisis created by improved aircraft technology, the advent of the jet age, increasing traffic in the airspace system, and the fact that little had been done to expand the capacity of the air traffic control system. As a result, in August 1957 President Eisenhower signed the Airways Modernization Act, a prelude to establishing the Federal Aviation Agency."

GRAND CANYON NATIONAL PARK (SOUTH RIM)

(M. E. J. Colter Buildings)

16.1310

M. E. J. Colter Buildings (17 pp. plus photos)

(Indian Watchtower at Desert View; Lookout Studio; Hopi House; Hermit's Rest)

Grand Canyon, Arizona; and vicinity of Grand Canyon, Arizona. 1.06 acre (Desert View), 1.18 acre (Hermit's Rest), less than 1 acre each (Hopi House and Lookout Studio). Periods of significance 1905-Present (Hopi House), 1914-Present (Hermit's Rest and Lookout Studio), 1931-Present (Desert View). [Hopi House and Lookout Studio are in the Grand Canyon Village Historic District.]

Nomination prepared 1986, Laura Soullière Harrison, Santa Fe, New Mexico.

At time of nomination, owner of properties listed as "Fred Harvey Company, Grand Canyon".

Summary: "Hopi House, Hermit's Rest, the Lookout Studio and the Desert View Watchtower are not only the best and least altered, but some of the only remaining examples of the work of master architect and interior designer Mary Elizabeth Jane Colter. Colter's place in American architecture is important because of the concern for archeology and a sense of history conveyed by her buildings, and the feelings she created in those spaces. More importantly, her creative free-form buildings, Hermit's Rest and Lookout Studio, took direct inspiration from the landscape and served as part of the basis of the developing architectural aesthetic for appropriate development in areas that became national parks. The buildings are also significant as part of the Atchison, Topeka, & Santa Fe Railway and Fred Harvey Company development on the south rim of the Grand Canyon—their most important destination resort. Desert View has additional regional significance in its tower paintings of Indian design—they were copied from prehistoric pictographs and petroglyphs at a New Mexico archeological site that is now destroyed. These may be the only surviving record of that rock art."

KAIBAB NATIONAL FOREST (TUSAYAN RANGER DISTRICT)

16.1311

Hull Cabin Historic District (listed October 23, 1986; 7 pp. plus photos)

(Hull Cabin)

Kaibab National Forest, Tusayan Ranger District, Arizona; 35 acres. *Ca.* 1890.

Nomination prepared October 30, 1984, Teri A. Cleeland, Williams, Arizona.

Summary: "The Hull Cabin Historic District is situated approximately 1.5 miles south of the Grand Canyon South Rim in northern Arizona. Located in the Kaibab National Forest, it is isolated from other South Rim developments. The Grand Canyon cannot be seen from the site—the structures are situated in a meadow surrounded by a virgin stand of large ponderosa pine trees; this setting is dramatic and highlights the buildings. Hull Cabin, built ca. 1890, is a tri-gabled, L-shaped, three-room log structure. Associated with the main cabin are two additional buildings probably built at the same time. One is a single-room, rectangular storage cabin similar in construction to Hull Cabin, and the other is a barn with hand-hewn square logs and a corrugated tin roof. A man-made reservoir (Hull Tank) is also included within the Hull Cabin complex."

16.1312

Grandview Lookout Tree* (listed January 13, 1992; 7 pp. plus photos)

Kaibab National Forest, Tusayan Ranger District, Arizona; 1 site; less than one acre. 1905-1940.

Nomination prepared May 30, 1990, Teri A. Cleeland, Williams, Arizona.

Summary: "Grandview Lookout Tree is located on a low unnamed ridge near the south rim of the Grand Canyon on the Tusayan Ranger District, Kaibab National Forest. It is within a mixed Ponderosa Pine and oak forest at an elevation of 7,240 feet. Although the tree is now a dead and standing snag, it still has many original features and is readily identifiable as a lookout tree. It retains sufficient integrity to qualify it for National Register listing under Criterion A.

"Grandview Lookout Tree is now a dead and standing snag, about 70 feet tall and 35 inches in diameter. A platform at the top is accessed by two rows of steel spikes (lag bolts) that lead to a ca. 5 foot long wooden ladder which is attached to a hatchway. The ca. 6 foot square platform is built of milled lumber. It has deteriorated and now only the framework remains. The handrail, if there ever was one, trap door, and mapboard platform are now missing from the structure and scattered on the ground around the base of the tree. Seven guy wires extend from the tree to the ground, and a grounding spike is at the base of the tree. These features conform to a 1931 diagram detailing lightning protection . . . . A wooden insulator post is on the north side of the tree at the base. Several insulators are on the ground. A telephone wire extends to the northeast from the tree. Some sheet metal is scattered about."

***NOTE**: The U.S. Forest Service lookout tower near Grandview is also listed in the National Register, but its nomination form has not been located.

16.1313

Hull Tank Lookout Tree (listed January 13, 1992; 10 pp. plus photos)

Kaibab National Forest, Tusayan Ranger District; 1 site; less than 1 acre. 1916-1940.

Nomination prepared May 29, 1990, Martin Flynn and Teri A. Cleeland, Williams, Arizona.

Summary: "Hull Tank Lookout Tree is located on an unnamed ridge near the south rim of the Grand Canyon on the Tusayan Ranger District, Kaibab National Forest. It is within a Ponderosa pine forest at an elevation of 7,400 feet. The tree and associated features are in excellent condition and the site retains integrity from the historic period.

"This lookout facility is built into a live Ponderosa pine tree that is about 65 feet tall and 32 inches in diameter. The top is accessed by two rows of steel spikes (lag bolts) driven at approximately two foot intervals from bottom to top on the southwest side of the tree. The top has been cut off the tree for a platform. The wood plank platform measures about 8 feet square. It has a trapdoor entry, a table (for the map board) at the southeast corner, and a 3 foot high handrail around the perimeter. The cut-off tree top penetrates the platform to about the height of the handrail. It has a 1" by 1" pine plank is [*sic*] nailed to its cut-off surface. This probably supported an alidade, protractor, or compass table. The trapdoor has a carved inscription: '1917 AC FW.' Running up the side of the lookout tree from bottom to top are a number of wooden insulator holders. Two glass insulators and one ceramic insulator were found in the area. Two of them are still in the tree and have telephone wire attached. Remnants of telephone wire are hanging from the tree and on the ground nearby."

16.1314

Moqui Ranger Station (listed June 10, 1993; 7 pp. plus photos)

(Tusayan Ranger Station)

Kaibab National Forest, Tusayan Ranger District, vicinity of Tusayan, Arizona; 2 acres. 1939-1942.

Nomination prepared September 26, 1989, Teri A. Cleeland, Williams, Arizona.

Summary: "Moqui Ranger Station is located adjacent to the Grand Canyon National Park South Rim boundary just north of the community of Tusayan, Arizona. This USDA Forest Service administrative facility (Kaibab National Forest) is an intact collection of six historic buildings, all designed and built for their setting between 1939 and 1942. (Although it is now known as the Tusayan Ranger Station, the historic name is used throughout this nomination.) Contributors include a dwelling with associated cistern/ shed, an office, a barn (with associated corral), a garage, and a seed house. Two noncontributors, a storage yard and a sattelite dish, are within the district boundary. The buildings are stylistically related to "NFS Rustic Architecture". Each building, as well as the entire site, retains a remarkable degree of integrity from the historic period."

16.1315

Grand Canyon Airport Historic District (listed August 31, 2007; 31 pp. including photos)

(Airport at Red Butte; Red Butte Aerodrome; AR-03-07-04-807)

Vicinity of Tusayan, Arizona, approximately 2.6 miles east of junction of U.S. Highway 180 and Forest Road 305; 90 acres + 0.01 acre. 1927-1956.

Nomination prepared January 2007 (revised May 2007), Pat Stein, Flagstaff, Arizona; based on an earlier draft by Giacinta Bradley Koontz.

At time of nomination, buildings and structures owned by Red Butte Airpark Restoration LLC, Austin, Texas; land owned by U.S. Forest Service, Kaibab National Forest.

Summary: "Grand Canyon Airport Historic District is a concentration of commercial and residential resources united historically, geographically and aesthetically by the plan of its original developers and subsequent historical users. The discontiguous district includes three buildings (a hangar, a bungalow-style duplex, and a root cellar) and four structures (two airstrips, an above-ground cistern, and an entrance sign structure) that contribute to the importance of the property during its period of significance (1927-1956). The district also includes one noncontributing building (a bam with attached corral) that was constructed after the airport's closure. Despite changes resulting from the airport's 1967-2004 use as a ranch, the district retains sufficient integrity of location, design, setting, materials, workmanship, feeling, and association to convey its important role in the development of air tourism to the Grand Canyon."

District Boundary: "The discontiguous district contains two parcels (the airport proper, and a discontiguous entrance sign structure), described as follows: (1) airport proper, a polygon containing 90 acres, the vertices of which are shown on the accompanying USGS quadrangle titled 'Red Butte'; and (2) entrance sign structure: a square parcel measuring 20ft by 20ft (0.01 acre), centering on the structure, the centerpoint of which is indicated on the accompanying USGS quadrangle titled 'Red Butte SW.'"

16.1316

Logging Railroad Resources (listed August 23, 2000; 38 pp. plus photos)

Coconino and Kaibab National Forests, Arizona [cited here for inclusion of Kaibab National Forest, Tusayan Ranger District] [redacted]. 1887-1966.

Nomination prepared January 1993, Pat Stein, Flagstaff, Arizona.

Summary: "The Kaibab and the Coconino National Forests are part of the largest expanse of ponderosa pine in the world. The timber belt is approximately 400 miles long and a maximum of 60 miles wide. It stretches in a nearly continuous band from southern Utah to just west of the Rio Grande River. Since the 1880s, lumbering has been a primary industry of this region. Logging was particularly important to the communities of Williams and Flagstaff, at times employing half their working populations, pumping millions of dollars into their economies, and building their infrastructures by constructing waterworks and power-generating plants. The technology that helped the lumber industry achieve success was the logging railroad. From the late 1880s to the 1940s, lumber companies in the study area built a cumulative total of more than 770 miles of rail line to tap the riches of the forest. Logging railroads were the instrument that allowed timber barons to pursue their quarry down canyons, across washes, and up mountains with amazing tenacity. Almost no virgin stand proved safe from the whistle of the locomotive.

"Three lumber companies and their successors built and operated these railroads: the Arizona Lumber Company (which became the Arizona Lumber and Timber Company and bought the Greenlaw Lumber Company), the Saginaw Lumber Company (reorganized as the Saginaw and Manistee Lumber Company), and the Flagstaff Lumber Manufacturing Company (which became the Flagstaff Lumber Company and was taken over by the W. M. Cady Lumber Company and Southwest Lumber Mills). Later sections of this nomination will discuss the histories of each of these companies, the areas they logged, and the railroads they built to access them. The following section discusses factors that contributed to the success and eventual obsolescence of railroad logging in the study area."

16.1317

Tusayan Lookout Tree (listed January 13, 1992; 7 pp. plus photos)

Kaibab National Forest, Tusayan Ranger District; 1 site; less than 1 acre. 1916-1940.

Nomination prepared May 30, 1990, Teri A. Cleeland, Williams, Arizona.

Summary: "Tusayan Lookout Tree is located on the rim of Long Jim Canyon about one mile west of the town of Tusayan on the Tusayan Ranger District of the Kaibab National Forest. It is within a mixed Ponderosa pine and oak forest at an elevation of 6,650 feet. The tree is still alive and the platform is largely intact. An APS electrical substation is located nearby (about 150 feet south) and is partially screened by trees. A trailer park is also located nearby to the east but is not visible from the site. Despite these encroachments on the site's setting, it maintains sufficient integrity to qualify for National Register listing. This lookout tree is a live Ponderosa pine about 50 feet tall and 24 inches in diameter. Branches are lopped off the west side of the tree and a wooden ladder was apparently once in place on this side. Remnants of the ladder are scattered on the ground, and nails that once secured the ladder remain in the tree. The top ten feet of the tree was sawn off for platform placement and is lying to the east of the tree. A 6 foot square platform of milled lumber is built into the crown. Unlike other lookout trees observed in the region, there are no remnants of a telephone line here."

NORTH

GRAND CANYON NATIONAL PARK (NORTH RIM)

16.1318

Grand Canyon Inn and NPS Campground (listed September 2, 1982; 8 pp. plus photos)

(North Rim Inn and Campground)

North Rim, Arizona. 77 acres. 1928.

Nomination prepared October 9, 1981, Gordon Chappell, San Francisco, California; revised Ron Johnson and Anthony Crosby.

Summary: "The Grand Canyon Inn, also called the North Rim Inn, consisted of a main building, 27 exposed frame cabins, and ten duplex log cabins. It offered a lower priced tourist accommodation than the more elegant Grand Canyon Lodge. Adjacent to it the National Park Service established a campground whose physical plant consisted of roads, outdoor fireplaces, stone enclosures for firewood, rest rooms and shower facilities, and an amphitheater for interpretive programs. The Inn and the campground stand in a forest of Ponderosa pine and quaking aspen above the head of, but screened by the forest from view of, Transept Canyon, and the Grand Canyon itself. Its location, therefore, was less desirable from the perspective of most tourists than Grand Canyon Lodge, which featured magnificent views from the tip of Bright Angel Point."

16.1319

Grand Canyon Lodge (11 pp. plus photos)

(Grand Canyon Lodge Historic District)

North Rim, Arizona; approximately 8.62 acres. 1927, 1936-Present.

Nomination prepared 1986, Laura Soullière Harrison, Santa Fe, New Mexico.

Summary: "Grand Canyon Lodge is the most intact rustic hotel development remaining in the national parks from the era when railroads fostered construction of 'destination resorts.' Constructed of native stone and timber the complex was designed to harmonize with its rocky and forested setting on the north rim of the Canyon and designed to create a particular sense of place that made the lodge a unique and noteworthy destination at the Grand Canyon. On a regional level of significance the complex is significant in the categories of transportation and tourism as part of the group of resorts constructed by the Union Pacific Railroad in Utah and northern Arizona."

16.1320

Grand Canyon National Park North Rim Headquarters (15 pp. plus photos)

(North Rim Headquarters)

North Rim, Arizona; 24 structures; approximately 12.22 acres. 1926 and following.

Nomination prepared November 12, 1981, Ron Johnson, Anthony Crosby, Gordon Chappell, San Francisco, California.

Summary: "The North Rim Headquarters District of Grand Canyon National Park consists of a number of utilitarian but harmonious buildings, and a few with features of rustic architectural design, emplaced in some intermittent clearings or meadows in a forest of mixed conifer (Ponderosa pine) and quaking aspen trees on the relatively flat plateau near the head of Transept Canyon, a side canyon off the Grand Canyon of the Colorado River. The headquarters area consists basically of two groupings of buildings, the easternmost consisting of several residences, a garage, and a ranger station, the western group, which is adjacent to the residences, consisting of maintenance buildings, a resources management office, a barn, and more residences. A number of the small residences in the district boundaries, and one other building, are lacking in integrity and therefore in significance, but they are harmonious and not intrusive."

16.1511

North Rim Entrance Road Corridor Historic District (7 pp.) [Apparently seen as an unfinalized, approved submission.]

(North Entrance Road; Grand Canyon Highway; Arizona State Route 67)

Grand Canyon National Park, North Rim; 14 contributing resources [2 buildings, 2 sites, 8 structures, 2 objects], 8 non-contributing resources [2 buildings, 6 structures]; 635 acres [road corridor, 10.6 mi. × 225 ft; entrance station/employee residence, 300 ft radius; Lindberg Hill, 500 ft radius; Harvey Meadow, 1000 ft radius; Little Park Meadow, 1.3 mi. × 2000 ft]. 1928-1942.

Nomination prepared February 18, 2011, Meaghan Heisinger, Arizona State University (ed. Carrie A. Mardorf, CLI Coordinator, National Park Service).

Summary: "The signifcance of the district between 1928 and 1942 is due to the construction of the entrance road during a period of the expansion of roadway systems within the National Park Service and is an excellent example of the efforts to incorporate landscape design into roadway planning. The year 1928 marks the begining of road planning and construction, while 1942 marks theend of New Deal era improvements to the district." (Active road construction, 1928-1931.)

KAIBAB NATIONAL FOREST (NORTH KAIBAB RANGER DISTRICT)

16.1321

Big Springs Ranger Station (listed June 10, 1993; 9 pp. plus photos)

Kaibab National Forest, North Kaibab Ranger District, Arizona; 2 acres. *Ca.* 1890.

Nomination prepared September 19, 1989, Teri A. Cleeland, Williams, Arizona.

Summary: "Big Springs Ranger Station is significant under criterion 'A' for its association with the history of the development of the US Forest Service and the Federal response to the Depression in Arizona. It is also significant under criterion 'C' because it embodies a distinctive style of architecture developed by the Forest Service during the Depression-era. The Period of Significance dates from 1934, when the first building was constructed, to 1942, corresponding with the end of the Great Depression and disbanding of the CCC."

16.1322

Jacob Lake Ranger Station* (listed July 13, 1987; 14 pp. plus photos)

Kaibab National Forest, North Kaibab Ranger District, Arizona; 1.7 acres. 1910.

Nomination prepared December 29, 1986, Teri A. Cleeland, Williams, Arizona.

Summary: "Jacob Lake Ranger Station is significant for its historic association with the initiation of land conservation programs by the U.S. Forest Service at the turn of the century. Built in 1910, Jacob Lake is the oldest extant Forest Service facility on the North Kaibab Ranger District of the Kaibab National Forest, and is among the oldest Ranger Stations in the USFS Southwest Region remaining in use today. These sites, erected in the wilderness, were the first physical manifestation of Forest Service administrative control over our nation's vast timber reserves. Forest Rangers working from these Ranger Stations established management programs for timber, livestock, tourism, wildlife, and fire protection."

*****_NOTE_: The U.S. Forest Service's Jacob Lake Lookout Tower is also listed in the National Register, but its nomination form has not been located.)

16.1323

Snake Gulch Rock Art (listed November 21, 1992; 18 pp. [redacted])

Snake Gulch, Arizona (Kaibab National Forest, North Kaibab Ranger District). *Ca.* 500 B.C.E.-1150 C.E.

Nomination prepared August 2, 1991, Marietta A. Davenport (Teri A. Cleeland, ed.), Williams, Arizona.

Summary: "Snake Gulch contains one of the finest collections of prehistoric rock art on the Colorado Plateau. The rock art sites in Snake Gulch are eligible for listing on the National Register of Historic Places under Criterion C because of the artistic and distinctive painted and pecked elements executed during Archaic, Basketmaker and Puebloan times. The aesthetic value of these sites is revealed in their artistic value and their fine execution in an isolated and beautiful setting. They are also eligible for listing under Criterion D for their potential to yield information important to understanding the prehistory of the Arizona Strip. They may reveal clues regarding the ideology of the ancients, as well as prehistoric cultural interactions among the Anasazi, Fremont, and other groups.

The sites have considerable research value and potential because they likely represent a long time range, demonstrate both diversity and representativeness in style, and are well preserved."

16.1324

Tater Point Lookout Tree (listed January 13, 1992; 8 pp. plus photos)

Forest Road 240, Kaibab National Forest, North Kaibab Ranger District, Arizona; less than 1 acre. *Ca.* 1905-1940.

Nomination prepared May 24, 1990, Marietta A. Davenport, Fredonia, Arizona.

Summary: "This isolated historic lookout tree is located on Tater Ridge on the eastern flank of the Kaibab Plateau on the North Kaibab Ranger District, Kaibab National Forest. It is within the open Ponderosa pine forest at an elevation of 8,000 feet. The tree is still alive. The site retains sufficient integrity to qualify for National Register listing. This lookout tree is ponderosa pine 100 feet tall and 3 feet in diameter with a ladder constructed up its northeast side. The 70 foot tall ladder begins 3 feet above the ground and has eight sections, all intact. The construction is typical of other ladders on lookout trees: 2" X 4" lumber sidepieces with 1" x 12" crosspieces. The ladder is attached to the tree with spikes."

16.1325

Telephone Hill Lookout Tree (listed January 13, 1992; 8 pp. plus photos)

Telephone Hill, near Arizona Route 67, Kaibab National Forest, North Kaibab Ranger District, Arizona; less than 1 acre. 1905-1940.

Nomination prepared May 24, 1990, Marietta A. Davenport, Fredonia, Arizona.

Summary: "This isolated historic lookout tree is located on Telephone Hill about 1/4 mile east of State Highway 67, and 40 meters north of the Kaibab Plateau Trail on the North Kaibab Ranger District, Kaibab National Forest. This tree is within the mixed conifer forest at an elevation of 8,910 feet. The tree is still alive. This site maintians sufficient integrity to qualify for National Register listing. This lookout tree is a white fir approximately 110 feet high and 4 feet in diameter with a ladder constructed up its west side. It has a pronounced lean to the east. Four contiguous segments of ladder works remain. The lower 10 foot portion has been removed. The remaining ladder is in good condition. The construction is typical of other ladders on lookout trees: 2" X 4" sidepieces with 1" x 12-14" crosspieces. It is attached to the tree with lag bolts. A platform may have been originally attached to this tree. Unlike other lookout trees in the area, there is a radio/telephone wire still dangling from this tree."

16.1326

Tipover Lookout Tree (listed January 13, 1992; 7 pp. plus photos)

Telephone Hill, near Arizona Route 67, Kaibab National Forest, North Kaibab Ranger District, Arizona; less than 1 acre. 1905-1940.

Nomination prepared May 24, 1990, Marietta A. Davenport, Fredonia, Arizona.

Summary: "This site, which has two historic lookout trees, is located on a ridge between Bear and Wall Lakes overlooking Demotte Park to the east and the Tipover, Big Spring and Kanabonits drainages to the south and west. It is on the interior of the Kaibab Plateau on the North Kaibab Ranger District, Kaibab National Forest. It is within the mixed conifer forest at an elevation of 9,160 feet. One tree is still alive and standing and the other has fallen. They maintain sufficient integrity to qualify for National Register listing. The standing lookout tree is a white fir 75 feet high and 3 feet in diameter with a ladder constructed up its eastern side approximately 40 feet. Two contiguous segments of ladder works remain. The first 10-15 feet are gone. The remaining ladder is in good condition. The construction is typical of other ladders on lookout trees: 2” X 4” lumber sidepieces with 1” x 12-14” crosspieces. It is attached to the tree with lag bolts. This tree is associated with a downed lookout tree with a ladder up its side and 6 foot by 6 foot platform in its top. This is the only documented platform tree on the North Kaibab Ranger District.”

ARIZONA STRIP REGION

(outside of Grand Canyon National Park and Kaibab National Forest)

16.1327

Horse Valley Ranch (listed April 12, 1984; 6 pp. plus photos)

(Waring Ranch)

Lake Mead National Recreation Area [site now within Grand Canyon-Parashant National Monument], Arizona; 28.47 acres. 1916-present.

Nomination prepared February 23, 1983, Gordon Chappell, San Francisco, California.

Summary: “The Waring Ranch, an early 20th Century cattle ranch located on the remote Shivwits Plateau north of the Colorado River in northern Arizona, is of local historical significance in association with events that have made a significant contribution to the broad patterns of western American history, specifically settlement of a late frontier and cattle ranching [*sic*] on the Arizona Strip. From this ranch, J.D. Waring waged a campaign, ultimately successful, to gain control of all of the plateau to the south of this ranch headquarters, reaching to the rim from which land dropped down into the Grand Canyon of the Colorado River. The ranch is also significant in that it embodies the distinctive characteristics of a type, period, and method of construction, specifically in that it represents a remote cattle ranch headquarters built in an era of kerosene illumination which never was modernized with electricity, and consists of buildings and structures built predominately of hand-hewn logs, with minimal use of manufactured materials.”

16.1328

Kane Ranch Headquarters (listed January 2, 2008; 23 pp. plus photos)

(Cane Ranch Headquarters; Kane Spring Ranch Headquarters; Bar Z Ranch)

Ca. 11 miles south of U.S. Route 89A on Forest Road 8910, House House Rock Valley, Arizona; less than 1 acre. *Ca.* 1877-1957.

Nomination prepared January 2007, Pat Haigh Stein, Flagstaff, Arizona.

Property owned by North Rim Ranch LLC (the members of which are Grand Canyon Trust and The Conservation Fund), Flagstaff, Arizona.

Summary: “The nominated property consists of the Kane Ranch Headquarters building (ranch house) and associated root cellar. The original part of the headquarters building, constructed circa 1877, is a one-story, two-room, side-gabled house with symmetrical massing, sandstone walls, a near full-width front porch, and cedar shake roofing. A three-room rear addition, constructed between 1892 and 1915, has sandstone walls with a shed roof above its northern two rooms and a saltbox roof above the southern room; roofing material consists of cedar shakes. The roof of the root cellar has collapsed and been removed, but the sandstone walls and floor of the building remain intact. The headquarters building and root cellar retain integrity of location, design, setting, materials, workmanship, feeling, and association, and strongly convey a sense of the property during its period of significance (circa 1877 to 1957)."

16.1329

Navajo Bridge [original span] (listed August 13, 1981; 8 pp. plus photos)

(Navajo Steel Arch Highway Bridge; Grand Canyon Bridge) [also as Colorado River Bridge, Lee's Ferry Bridge]

Southwest of Lees Ferry, Arizona [current U.S. Route 89A at Marble Canyon]; 1.9 acres ["acreage not verified"]. 1928.

Nomination prepared June 2, 1980, Don Abbe, Lubbock, Texas.

Summary: "The Navajo Bridge is a deck-type steel arch bridge built across the Colorado River in 1928. The site of the structure is six miles below Lee's Ferry and four miles below the mouth of Paria Creek. The overall length of the bridge, including the approach roadways, is 834 feet. The main span is 616 feet long, the two approach spans on the north rim are 84 feet each and the single approach span on the south rim is 50 feet long. The top of the arch is 467 feet above the Colorado River, while the rise of the main span, from bottom pin to roadway surface, is 103 feet. The roadway of the bridge is poured concrete instead of the traditional timber to avoid fire hazards and maintenance problems. It measures 18 feet between the curbs and the overall width of the bridge is 19' 6". The bridge structure is composed of the main arch and the approach spans. The three-hinged main arch is composed of 22 panels, each one being 28 feet in length. These panels were designed for reversal of stresses for cantilever erection. The short approach spans are of very simple plate girder and/or vertical truss design. Since its completion, the bridge has been maintained by the State of Arizona and is a preserved original structure. It presents the same appearance today as it did when it was dedicated in 1929."

16.1439

Pipe Spring National Monument (listed August 25, 1986; 36 pp. including photos)

Highway 389, Moccasin, Arizona; six contributing resources, one non-contributing resource; 2.5 acres. 1858-1884.

Nomination prepared September 28, 1984, Susan A. Tenney, Denver, Colorado.

Summary: "The Pipe Spring National Monument Historic District includes three historic sandstone buildings (the Pipe Spring National Monument was established May 31, 1923 by proclamation (number 1663) of President Warren G. Harding to serve as a memorial of western pioneer life.

"The standing buildings and dugout remains of the Pipe Spring National Monument have both local and state significance for their role in the exploration and settlement of the Arizona Strip and for their part in the development of vernacular classical revival style architecture under Criteria A and C. National significance is indicated because the structures also remind us of the struggle for exploration and settlement of the Southwest which was an important segment of the history of American westward migration. This site is also significant in the religious history of the nation because of its association with the Church of Jesus Christ of the Latter Day Saints (Mormons) and their pioneer settlement of Zion.

"The architecture at Pipe Spring represents a nationally significant example of fortified residential architecture in Mormon Vernacular Classical Revival style, which is typified by the excellent stone masonry. In addition, the architecture represents the typical Mormon Vernacular Classical Revival style prior to the establishment of the railroad.

"The corrals and stone walls, ca. 1879, contribute to the overall integrity of the monument by providing tangible examples of the necessary land improvements that a working cattle operation require."

"All buildings included in this nomination date from the 19th century and include the fort, the remains of the dugout, and two support structures."

16.1330

Pipe Spring National Monument Historic District [boundary increase] (listed September 14, 2000; 69 pp. plus photos)

(Fort Arizona, Pipe Spring(s) Fort, Pipe Spring(s) Ranch, Winsor Castle, Windsor Castle, Winsor Castle Ranch; HS-1-3; Buildings 50-52 (fort/cabins))

401 N. Pipe Spring Road, Fredonia, Arizona; contributing resources, 3 buildings, 2 sites, 3 structures; non-contributing resourceds, 2 buildings, 4 structures; *ca.* 6.5 acres. 1863-1895.

Nomination prepared July 5, 2000, Kathy McKoy, Denver, Colorado.

Summary: "The Pipe Spring National Monument Historic District includes three historic sandstone buildings (the imposing Pipe Spring fort, flanked by two small cabins, one to the west and another to the northeast); two historic-period sites (the Whitmore-Mclnytre dugout and a lime kiln); and three structures associated with the site's history (the quarry trail, fort ponds; and retaining walls northeast of the fort). Construction dates for these resources range from 1863 to ca. 1885. Built by local craftsmen, the architectural style of the buildings is vernacular with the fort incorporating some Classical design elements. Noncontributing buildings and structures within the district include a reconstructed telegraph line, two sections of retaining wall, and a corral complex, outhouse, and chicken coop. Non-intrusive, tinted concrete walkways, laid in 1991, provide visitor access to the historic buildings, ponds, and waysides. Other landscape features on the 40-acre monument that lie outside the district boundaries include a vegetable garden, orchard, vineyard, corrals, and fencing. Modern developments, also located outside district boundaries, are at the southernmost part of the monument and include a residential area, maintenance area, and access road. This area is fairly well screened by plantings. Currently, the monument's administrative offices and visitor center are located just outside the monument's east boundary in leased portions of a Park Service-designed building, constructed of native sandstone in the early 1970s on the Kaibab Indian Reservation."

16.1475

St. George Temple (listed November 2, 1977; 9 pp.)

Block bounded by 200 East, 300 Est, 400 South, and 500 South, St. George, Utah; less than 1 acre. 1871-1877.

Nomination prepared March 15, 1977, A. Kent Powell and Allen D. Roberts, Salt Lake City.

Summary: "Historically the St. George Temple served to unite the settlers of Utah's Dixie and provided a great stimulus to the local economy. It was the first Mormon temple dedicated in Utah, and the only temple in which Brigham Young participated in the dedication services after the Mormons left Illinois." [Historical summary includes remarks pertaining to resources on the Arizona Strip, including:] "There were roadbuilding crews, particularly to the sawmills on Mount Trumbull, eighty miles southeast of St. George near the depths of Toroweap, a part of the Grand Canyon of the Colorado. Water haulers supplied from the infrequent springs on the Arizona Strip, kept the lumber teams traveling between St. George and the sawmills. At the mills themselves, crews under Robert Gardner were busy getting out the million feet of lumber that went into the floors, joists, studding, pillars, window frames, doors, steps and stairways, and baseboards. From Pipe Springs, under Anson P. Winsor's management, came beef, cheese, and butter from the church herd to help feed the Temple workers.” “The temple was made entirely of indigenous materials with the exception of the twelve cast iron oxen and baptismal font which were cast in Salt Lake City and hauled 318 miles to St. George by ox team.”

GLEN CANYON NATIONAL RECREATION AREA
(LEES FERRY DISTRICT)

16.1331

Lee’s Ferry Historic District (listed March 15, 1976; 11 pp. plus photos)

Glen Canyon National Recreation Area, Lees Ferry District, Arizona; *ca.* 120 acres. 1776-present.

Nomination prepared October 14, 1974, Temple A. Reynolds, Page, Arizona.

Summary: “Lees Ferry Historic District contains remnants and evidence of man’s activities dating at least from 1776 to present day. Its historic resources trace periods of exploration, pioneer settlement and colonization, frontier commerce, and early Southwest mineral exploration and mining activities. that such varied activity over such a lengthy time period should occur in this 120 acre district illustrated the importance of Lees Ferry and its signficance in the human history of the Southwest territories.”

16.1332

Lee's Ferry and Lonely Dell Ranch (listed November 4, 1997; 58 pp. plus photos)

(Pahreah Crossing; Lees Ferry; Lee's Ferry Ranch/AZ-C-2-42, AZ-C-2-11)

Glen Canyon National Recreation Area, near Marble Canyon, Arizona; contributing resources, 2 buildings, 6 sites, 1 structure, 2 objects; non-contributing resources, 6 buildings, 1 site, 3 structures; 470 acres. 1872-1928 (Lee's Ferry); 1871-1936 (Lonely Dell Ranch).

Nomination prepared July 1997, Ann Hubber, Missoula, Montana.

Summary: "Lee's Ferry/Lonely Dell Ranch Historic District is eligible for listing in the National Register of Historic Places under criterion A for its association with Mormon settlement (areas of significance: Transportation, Agriculture, Commerce, and Ethnic Heritage) and its association with exploration and development of the Colorado Plateau (areas of significance: Exploration/Settlement and Industry). District resources are also significant examples of pioneer construction, where residents built what they needed with what they had (area of significance: Architecture). Finally, the district is significant for its association with Mormon 'Zealot, Pioneer Builder, Scapegoat,' John D. Lee. The district has been evaluated within the context of Mormon settlement of the larger region of 'Deseret,' defined by the Church of Jesus Christ of Latter-day Saints (LDS) as including all of Utah, southern Idaho, and Arizona. This expansion beyond the Great Salt Lake Basin was pivotal to the consolidation of Mormon economic and political power and thus to the creation of a western Zion where Mormons were able to withstand attack by non-Mormons and assimilation within non-Mormon culture. Within this regional context, the isolated Lee's Ferry crossing at the Colorado River played a significant role. In contrast to the original National Register nominations, district boundaries have been drawn to include both Lee's Ferry and the Lonely Dell Ranch (located approximately ½ mile to the northwest) within a single historic district. These boundaries reflect the importance of the ranch to the ferry operation: Jacob Hamblin chose the crossing site not only for its accessibility but also for the presence of water and cultivable land from which a ferryman and his family could support themselves. Lonely Dell Ranch made Lee's Ferry possible. During the historical period, the limits of cultivable land and of traversable terrain (rather than formal delineation of legal ownership) defined the limits of land use. These same natural barriers from the boundaries of the historic district. A variety of resources are found within these boundaries, including those related to mining (extraction/processing) and to the exploratory efforts of the U.S. Geological Survey. These resources have been included as contributing components of the district, linked to the primary areas of significance by their shared dependence upon the river, the means of access and egress, and the sustenance provided by Lonely Dell Ranch."

16.1333

Lonely Dell (listed May 19, 1978; 71 pp. plus photos; and with additional documentation, 1997, 4 pp.)

(Lonely Dell Ranch Historic District)

Glen Canyon National Recreation Area, near Page, Arizona; 160 acres (470 acres, 1997). 1871-1939.

Nomination prepared April 27, 1977, James A. Muhn, Denver, Colorado (September 1997, Ann Hubber, Missoula, Montana).

Summary: "Lonely Dell Ranch Historic District consists of a cemetery, an orchard, farmlands, remnants of an irrigation system, two water settling ponds, and five historic structures. The 160 acres that comprise the historic district were originally homesteaded by John D. Lee and his wife Emma in the 1870's, and were purchased by the National Park Service in 1974. The structures, agricultural lands, and the surrounding arid territory all help support the theme of the historic district as being a typical subsistence farm/ranch of the late nineteenth and early twentieth centuries in the American Southwest."

"In 1997, resources at Lonely Dell Ranch and adjacent Lee's Ferry were listed in the National Register of Historic Places as a single historic district ('Lee's Ferry/Lonely Dell Ranch Historic District'). Restrictions on changes and revisions to properties listed in the National Register prior to December 13, 1980 (see 60.14-60.15 36 CFR 80) precluded concurrent de-listing of the original Lees Ferry Historic District and Lonely Dell Ranch Historic District. [Document contains] amendments to Sections 7 and 10 [that] identify the variations between this (1978) and the most-recent (1997) evaluation of Lee's Ferry resources."

OTHER SITES IN THE GREATER GRAND CANYON REGION

16.1334

Cameron Suspension Bridge (listed June 5, 1986; 10 pp. plus photos)

Vicinity of Cameron, Arizona; 1.5 acres. 1911.

Nomination prepared June 1980, Don Abbe, Lubbock, Texas (revised March 1986, Roger Brevoort and Doug Kupel, Arizona State Historic Preservation Office).

At time of nomination owner listed as Four Corners Pipeline Company, Long Beach, California.

Summary: "The Cameron Suspension Bridge, constructed in 1911, is significant for its association with the initial growth of Arizona's highway system as a major bridge which opened up the northern portion of the state to development. It also represents a large early construction project of the Office of Indian Affairs, which later went on to construct numerous other engineering projects on Indian reservations in Arizona and throughout the western states. A hybrid of suspension and truss forms, the bridge has engineering significance as the oldest surviving highway suspension bridge in the state and one that utilized novel engineering techniques to cross the wide canyon of the Little Colorado River."

16.1398

Cattle Ranching in Arizona, 1540-1950 (from Multiple Property Documentation Form; 103 pp.)

Statewide [including Arizona Strip].

Form prepared by William S. Collins, Phoenix, Arizona. [2002.]

"In 1992, the federal agricultural census counted nearly 930,000 head of cattle in Arizona. These animals are a highly visible presence on the rural landscape. Though widely dispersed, they are found in all parts of the state. There are few places in Arizona so arid that no cattle graze on them. Where they are lacking it is usually because of legal barriers restricting land use, and there is a long and loud political debate over conflicting efforts to strengthen those barriers by some and weaken them by others. Of the state's 72,688,000 acres, about 40 percent, or 29,642,000 acres, is classified as pastureland and rangeland. This land crosses all jurisdictions—private, state, federal, and Indian trust. Cattle are some of the most significant land users in Arizona."

16.1399

Cattle Ranching in Arizona, 1945-1970 (from Multiple Property Documentation Form; 105 pp.)

Statewide [including Arizona Strip].

Form prepared by William S. Collins, Phoenix, Arizona. [2007.]

"This document is an amendment to the Cattle Ranching in Arizona, 1540-1950 Multiple Property Documentation

Form (MPDF) covering the transitional era of the beef cattle ranching industry in Arizona after the Second World War. The major themes and facts described in that earlier document will not be repeated here and readers are encouraged to review it for information on the broad patterns of historical cattle ranching in Arizona's Spanish Colonial, Mexican, American Pioneer, and Early Modern eras. The purpose of this amendment is to provide technical guidance that historic preservationists, government officials, private property owners, and others may use to valuate surviving examples of modern-era cattle ranches for eligibility to the National Register of Historic Places."

16.1335

Dead Indian Canyon Bridge (listed September 30, 1988) [supplementary data to National Register information seen in the form of HABS/HAER Inventory record card]. [See also in Part 16 under U.S. National Park Service, Historic American Engineering Record (1994, ITEM NO. 16.1232).]

Abandoned grade of U.S. Route 64 over Dead Indian Canyon; milepost 282.51, 13.2 miles west of Desert View.

Summary: "During the early 1930s, the Arizona Highway Department and U.S. Bureau of Public Roads undertook an extensive roadbuilding effort to provide automobile access from the east to Grand Canyon National Park's south rim. In 1929, the Navajo Bridge was completed, opening Arizona from the north. The following year AHD contracted for FAP-95-B—the state's largest highway construction project to date—covering 95 miles between the bridge and Cameron. The BPR built the Cameron-Desert View Approach to the part, naming the 31-mile route the NavaHopi Highway. Made up of riveted steel deck trusses supported by steel piers, the Dead Indian Canyon Bridge comprised an Integral part of this road. BPR engineers designed this trestle in 1933 and awarded the contract for its construction on August 31 to Vinson and Pringle for $44,938. The contractors had completed the steel erection by January and in May completed the bridge. Now designated State Highway 64, the road still provides important access to the park, although in a realignment this bridge has been abandoned in place."

16.1336

Grand Canyon Railway (listed August 23, 2000; 38 pp. plus photos)

From Williams, Arizona, to Grand Canyon National Park; contributing resources, 1 building, 17 sites, 61 structures; non-contributing resources 17 buildings, 3 structures; 1,682 acres. 1898-1948.

Nomination prepared January 12, 1998, Al Richmond, Flagstaff, Arizona.

At time of nomination owner listed as Grand Canyon Railway, Flagstaff, Arizona.

Summary: "The Grand Canyon Railway runs on the historic right of way as built by the Santa Fe and Grand Canyon Railroad, and the Atchison, Tbpeka, and Santa Fe Railway between 1898 and 1901. It is located on the rolling terrain of the Coconino Plateau in northern Arizona within the boundaries of the Colorado Plateau. Its southern terminus is the Historic District of the City of Williams where it connects with the Burlington Northern Santa Fe Railway at an elevation of 6800 feet MSL. From Williams, the railroad proceeds in a generally northerly direction through Ponderosa pine and Pinon-Juniper forests, and then drops down into the high desert plains to the low point of 5765 feet MSL at Miller Wash (MP 36.0). The line then begins a gradual ascent to Anita, the site of the original destination of the SF&GCRR, where an abandoned spur track leads to the dormant Anita Mines. It then continues on a steep 3% grade up through Pinon- Juniper and Ponderosa pine forests to Apex (MP 52.0). Here, the Saginaw & Manistee Lumber Company operated a logging camp. The right of way then descends into the serpentine course of Coconino Canyon and once through this area climbs to the south rim of the Grand Canyon at an elevation of 6820 feet MSL. Here, the railroad enters the national park and the Grand Canyon Historic District. The main line is 63.789 miles in length, is entirely standard gauge, and passes through eleven extant or abandoned sidings and stations. After rehabilitation of the main line to original or better condition in 1989, the line has continued in service as a alternate means of transportation into the National Park. It will continue to so serve for the foreseeable future."

16.1337

Peach Springs Trading Post (listed November 21, 2003; 17 pp. plus photos)

Peach Springs, Arizona; less than 1 acre. 1928-1953.

Nomination prepared August 2003, Pat Haigh Stein, Flagstaff, Arizona.

At time of nomination owner listed as Hualapai Indian Nation, Peach Springs, Arizona.

Summary: "The Peach Springs Trading Post is a stone and concrete building in the Pueblo Revival style. Built in two phases in 1928, it historically housed a trading store, post office, and trader's living quarters. The facility catered mainly to residents of the Hualapai Indian Reservation and motorists along Route 66. After its acquisition by the Hualapai Tribe circa 1950, the building was first used as a store/post office, and later as a river-rafting office and Job Corps headquarters. It currently provides office space for the Tribe's Forestry and Wildlife Conservation departments. Although its function has changed, the building still retains good integrity of location, design, setting, materials, workmanship, and feeling."

ADDENDUM

Ancillary List of Contractual and Other Historic-Structures and Cultural Landscape Reports

Unrelated to National Register nominations are 17 contractual and other reports on historic structures at Grand Canyon National Park and at Lees Ferry, and four cultural landscape reports on park and regional sites. These are already cited under their respective authors throughout Part 16, but are also gathered in a single list here as a matter of convenience. (The ITEM NUMBERS are unchanged from those with the citations in Part 16.)

In addition, interested users may wish to refer to entries listed in Part 16 under:

PART 17. NATIVE AMERICANS IN THE GRAND CANYON REGION

OVERVIEW. This part focuses on documents that pertain to the Havasupai and Hualapai tribes, traditional recent residents of the Grand Canyon, including social and other concerns of these tribes, and activities on behalf of these indigenous peoples. Other Native American tribes are included in this part only with respect to their activities on their traditional lands in the Grand Canyon region or with respect to the canyon in their heritage. Items relating to tribal cultural claims to the Colorado River are also included. Anthropological studies in general, which include the Havasupai, Hualapai, and Kaibab Band of Paiute Indians in particular, are also listed here.

RELATED MATERIAL

PART 2. GENERAL PUBLICATIONS for items that relate to hikes and other activities in Havasu Canyon that do not pertain specifically to the Havasupai

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography

PART 6. YOUTH for pertinent items that relate to this part of the bibliography

PART 11, SECTION 3. LOWER COLORADO RIVER—ARCHAEOLOGY AND CULTURAL RESOURCES for publications relating to Native Americans of the lower Colorado River region, including the Lake Mead region

PART 16. ARCHAEOLOGY for publications relating to Native Americans of the Grand Canyon region prior to European contact, or to archaeological documentation of Native American heritage claims to the Grand Canyon

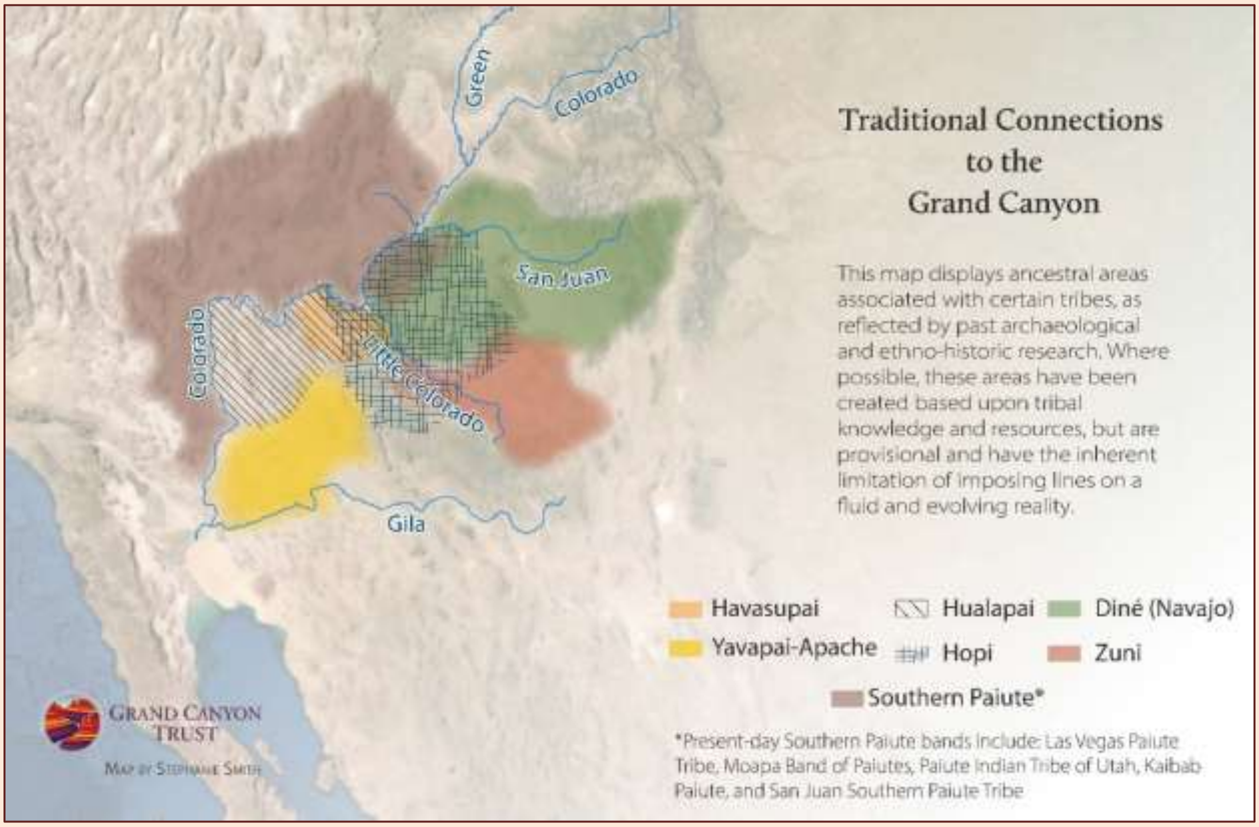
NOTES FOR PART 17

THIS part of the bibliography relates to Native Americans of, and their relation with, the Grand Canyon. By default of their residency at and in the canyon, the Havasupai and Hualapai people are the principal focus of this part of the bibliography; also the nearby Kaibab Band of Paiute Indians. In addition, there are citations that relate in some fashion to the cultural relationships and claims that other tribes have in the Grand Canyon. This is not a bibliographical listing for the tribes in general; only their relationships with the canyon, though more comprehensively regarding the currently resident Havasupai and Hualapai.

Some topics that may seem to be out of scope, insofar as the tribal relationships with Grand Canyon are concerned, are included here. For example, some citations pertain to Havasupai legal claims against Arizona State University, which relate to the unsanctioned uses of blood samples that were given by tribal members to a university researcher specifically for research on diabetes in this community (a disease that disproportionately afflicts many of these people, and notably other tribal peoples as well). While this in itself may seem unrelated to the Grand Canyon, additional studies were conducted with the samples, without the permission or knowledge of those from whom the blood was taken. These other studies arrived at scientific conclusions and social statements, which were published, that are decidedly contrary to the cultural beliefs of the Havasupai people and their relationship with the Grand Canyon. The resolution of these legal issues has provided some positive outcome for the individuals and the tribe. Now the affair remains the subject of worldwide cautionary and instructive attention among bioethecists and legal scholars, citations about which are included here because of that far-reaching impact. Many of these publications were produced during the progress of the legal case, and thus they provide evolving perspectives of the issues prior to the final resolution between the tribal litigants and the university. The effects of this case further emphasize the weight and truth of cultural beliefs.

Not all of the Native American tribes who exercise cultural claims to the Grand Canyon may have citations listed in THE GRAND CANON, except in a general or summary fashion; only the publications that have come to our attention, and which relate specifically to activities in the Grand Canyon region, are cited herein. The involved tribes (as defined by the federal government) are:

Native American Peoples with Traditional Cultural Ties to the Grand Canyon



Traditional Connections to the Grand Canyon

This map displays ancestral areas associated with certain tribes, as reflected by past archaeological and ethno-historic research. Where possible, these areas have been created based upon tribal knowledge and resources, but are provisional and have the inherent limitation of imposing lines on a fluid and evolving reality.

*Present-day Southern Paiute bands include: Las Vegas Paiute Tribe, Moapa Band of Paiutes, Paiute Indian Tribe of Utah, Kaibab Paiute, and San Juan Southern Paiute Tribe

(Grand Canyon Trust)

https://www.grandcanyontrust.org/sites/default/files/maps/resources/gc-grand-canyon-traditional-areas.pdf

Havasupai Tribe, Havasupai Reservation (Arizona)
Hopi Tribe (Hopi Indian Reservation, Arizona)
Hualapai Indian Tribe, Hualapai Reservation (Arizona)
Kaibab Band of Paiute Indians, Kaibab Indian Reservation (Arizona)
Las Vegas Band of Paiute Indians, Las Vegas Indian Colony (Nevada)
Moapa Band of Paiute Indians, Moapa River Indian Reservation (Nevada)
Navajo Nation (Navajo Indian Reservation, Arizona, New Mexico & Utah)
Paiute Indian Tribe of Utah
    Cedar Band of Paiutes, Kanosh Band of Paiutes, Koosharem Band of Paiutes, Indian Peaks Band of Paiutes, and Shivwits Band of Paiutes
San Juan Southern Paiute Tribe (Arizona)
The Pueblo of Zuni, Zuni Reservation (New Mexico)
Yavapai-Apache Nation, Camp Verde Indian Reservation (Arizona)

The cultures of the people who hold ancestral ties to the Grand Canyon span regions beyond the area focused on by THE GRAND CANON, yet the geographical definition of this bibliography is defined by physical geograhpy. There certainly are many published works about each of these peoples that will provide a user with the important, more meaningful broader cultural perspectives, but they do not meet the geographically established criteria to be included herein. The Grand Canyon is a part of these peoples' ancestral landscapes and spiritual beliefs; indeed, it is not seen, nor participated in, with the same perspective beween these different peoples, as well as it is not seen in the same sense even between indivuals of one tribe or clan. This will have to suffice as an apology for the geographical boundaries imposed on this part of the bibliography. The boundaries are nearly as meaningless to Indigenous peoples as are political boundaries such as those of the national parks, forests, and most objectively, the reservations.

Matters relating to Native Americans who relocated to the Colorado River Indian Tribes' reservation on the lower Colorado River will be found in Part 11, Section 3 of this bibliography.

Included in Part 17 are items that relate to Colorado River water rights of the Native American groups, although most of these also appear in Part 12, Section 1 of this bibliography.

1950 17.1540 Hualapais celebrate land ruling. *In:* Here and There on the Desert [SECTION]. *Desert Magazine*, 13(7) (May): 30. [U.S. Supreme Court decree affirming Hualapai "right to more than half a million acres of railroad grant land bordering the Colorado River". Item credited to *Mohave County Miner*.]

1950 17.1549 Havasupai pass schooling law. *In:* Here and There on the Desert [SECTION]. *Desert Magazine*, 14(2) (December): 32-33. ["A recent tribal ordinance requires compulsory school attendance for children up to 17 and regular medical examinations for the approximately 200 members of the tribe."]

1951 17.1551 Isolated tribe to modernize. *In:* Here and There on the Desert [SECTION]. *Desert Magazine*, 14(6) (April): 25. ["Grand Canyon—Two hundred Indians, living in Havasupai Canyon, are planning to adopt a paleface tourist lure. They are erecting a small group of cabins on their remote reservation to accommodate visitors. To reach them it is necessary to travel 60 miles over a poor road, then hike or ride horseback nine miles down a steep trail. Everything that goes in or comes out passes over this precarious trail. Tourist income last year was $5000. It is hoped the cabins will increase the income. Dudley Manakacha, who has been chief since his father's death in 1942, died recently in Phoenix. A new chief will be elected.—*Gallup Independent & Tucson Daily Times.*" (ENTIRE ITEM)]

[See "Toltekai" [Toltecs] (pp. 69-71), specifically the remarks (p. 70): "Bendruomenėje išsiskiria dvi grupės: paprasti nariai ir pasišventę sekėjai. Šis narių pasidalijimas atspindi nevienodus narių poreikius. Iš tiesų atrodo, kad daugelio paprastų narių šamanizmas, intensyvios dvasinės patirtys ar išskirtiniai „dvasinių karių" gebėjimai nedomina. Jiems rūpi įvairių praktinių, gyvenimiškų problemų sprendimas, savižina, psichologiniai klausimai ir laimės pojūtis. Aktyviausi nariai renkasi į keturis kartus per metus vykstančius Mitotės ritualus ir keliauja į jėgos vietas Centrinėje ir Pietų Amerikoje. **Dauguma praktikų skirtos visiems žmonėms ir nepriklauso nuo jų pasiekto dvasinio tobulėjimo etapo. Vis dėlto kelias iš jų gali atlikti tik pažengę toltekai: pvz., „šamanišką skrydį", atliekamą kelionėse po Amerikos Didįjį kanjoną**." (*translation here*) 'Two groups stand out in the community: ordinary members and dedicated followers. This division of members reflects the different needs of the members. Indeed, many lay members seem to have no interest in shamanism, intense spiritual experiences, or the extraordinary abilities of "spiritual warriors." They care about the solution of various practical, life problems, self-awareness, psychological issues and the feeling of happiness. The most active members gather for Mitote rituals held four times a year and travel to places of power in Central and South America. **Most of the practices are for all people and do not depend on the stage of spiritual development they have reached. However, several of them can only be performed by advanced Toltecs: for example, the "shamanic flight" performed on tours of the Grand Canyon of America**.' No further details with respect to Grand Canyon.] [In Lithuanian.]

Arias, Jalayne J.; Pham-Kanter, Genevieve; Gonzalez, Rosa; AND Campbell, Eric G.

2015 17.1789 Trust, vulnerable populations, and genetic data sharing. *Journal of Law and the Biosciences*, 2015: 747-753. [Introduction begins with note of the recently published "Notice of Proposed Rulemaking : Federal Policy for the Protection of Human Subjects" (*see* U.S. Department of Homeland Security, *et al.*, 2015, *Federal Register*, 80(173) (September 8): 53933-54061, ITEM NO. 17.1790). Arias *et al.* note that this notice "acknowledges the potential loss of public trust associated with high-profile disputes over biospecimens collected in research, including the Havasupai case [the Havasupai blood-use case] and the Lacks Family settlement [not pertinent to this bibliography]." No further text mention of these cases by Arias *et al*. In turn, the *Federal Register* item mentions only "the erosion of public trust that can result from high-profile disputes involving the use of non-identified biospecimens collected during research" (p. 53943); the accompanying *note 43* credits a web-posted document for this statement: "National Congress of American Indians. Havasupai Tribe and the lawsuit settlement aftermath. Retrieved on November 17, 2014, from *http://genetics.ncai.org/case-study/havasupai-Tribe.cfm*." The web-posted document is more fully cited as: National Congress of American Indians, American Indian and Alaska Native Genetics Resource Center, "Havasupai Tribe and the lawsuit settlement aftermath"; but as a webpage only, this is not separately citeable in the present bibliography (accessed December 18, 2015).]

Berard (Father)

1917 17.1828 [Excerpt from letter to F. W. Hodge.] *From:* The meaning of “Tusayan”. *In:* Anthropological Notes [SECTION]. *American Anthropologist*, New Series, 19(1) (January/March): 151. [Remarks on the etymological derivation of “Tusayan” from “Father Berard, O.F.M., of St. Isabel’s, Lukachukai, Arizona”. Of pertinence to this bibliography is the passage (ellipsis thus): “The resemblance between the Navaho *Tasaun* or *Zilh Tasaun*, ‘the country of isolated buttes,’ and *Tusayan* would seem to be fortuitous. . . . I take it that *Tasaun* or *Zilh Tasaun* stands for *dzil da’ sa’â*, which signifies monocline or a lone butte or mountain. *da* is not the sign of the plural, but an adverbial abbreviation for *a’da’*, ‘the drop off’ of a mountain ridge, in this instance the lone mountain at the mouth of Grand Cañon in the Supai District. This would hardly cover *Tusayan* or its people for which the Navaho use *a’yakini*, a word meaning ‘the people living in underground houses, or houses you enter from above,’ which makes no reference to their topography.”]

Berardo, Marcellino
